President Elect of the Republic of Texas
@paint_texas

I want a New Honest America for the children who will inherit it.

A series of things that we must absolutely accomplish

1. Schedule an honest revote for every elected office as soon a possible

2. The CIA and the FBI have become pockets of criminal activity, they must be completely reevaluated to determine if they are beneficial to the United States.

3. Ever since the Rockefeller's infiltrated and corrupted the medical industry, disease has not gone down, it's skyrocketed. This has to be changed, starting with this - Vaccines.

4. The Media in America is Corrupt and it's in he hands of a few, whose goals are aligned -- and are not in the best interests of America.
Break up the Media~!

5. Stop the intrusion of Big Tech into the private lives of Americans. Break up the Google Monopoly. Destroy "all" internet monopolies. Remove Social Media's protection under Section 230.

6. Give every American a choice of who "educates" their children. Government education/indoctrination is not mentioned in the Constitution and it should be up to parents, who and where their own children attend school.

7. End the Federal Reserve and the IRS. Both are illegal and Unconstitutional in many ways. No argument can be made to continue this organized crime syndicate.

8. Once we have honest elections, guaranteed by Blockchain or technology that ends fraud as much as humanly possible. We should also audit all politicians and their families as long as they hold office. We should invoke the Death Penalty for Voter Fraud.
