#ANGELONE being the strongest among the #broking stocks has taken off!

Which one would be the next?

I think it is just about time for #broking stocks to \U0001f680!

- #AngelOne looks the strongest & near ATH
- #Isec near major trendline support, forming Dojis on weekly
- #Motilalofs near major trendline supports, forming Dojis on monthly

All three low-risk setups!#stockideas pic.twitter.com/xB3Tm9jSou
