On track to 5850...

As per traditional chart analysis, the breakout from the flag can extend by a distance of the flagpole which gives us the price objective of 5850 or thereabouts.

Let's see what happens!

Looks like a Flag to me...

A flag pattern is a continuation pattern that suggests a short-term consolidation in opposite direction preceding a strong move.

A breakout above 4850 could have a rapid movement! [#ApolloHospitals](#) pic.twitter.com/q7g4enQjRY
