33900 gone on #Banknifty

System says don't buy the dip

Wait for dip of dip of dip at 30500 #Banknifty & 15000 #Nifty

#Banknifty 33900-34100 zone has provided Support & bounce multiple times in last 12 months.

Watch this level carefully in current week. If 33900 goes, would open up big downside towards 30500 in May series (Which is confluence of multiple support & AVWAP from Mar20 lows) pic.twitter.com/B7KUNkVVSE
