Read about "#Bollingerbandstartegy" here.

Read again till you understand the logic fully of a "Moving avg (13Sma) & its upper & lower band" mechanism and then,

Apply on charts of your short listed stocks and understand how the trades/ investments would have worked -back testing

Bollinger band has been a trusted guide with the settings of 13sma & 2 std deviation. Add to it 5 & 8 smas and it works in all time frames.

Start from week & Day for investments; Hour & 5 minute for intraday.

Experiment initially; you'll still need other tools to read the mkt\U0001f600\U0001f64f pic.twitter.com/yEkHiDHiha
