

The Ring of Fire is a major area of seismic and volcanic activity, forming a large horseshoe around the Pacific Ocean basin. It is characterized by frequent earthquakes, volcanic eruptions, and the presence of numerous active volcanoes. The Ring of Fire is formed by the boundaries of several tectonic plates, including the Pacific Plate, North American Plate, South American Plate, Nazca Plate, Cocos Plate, Caribbean Plate, Philippine Plate, and Indo-Australian Plate.

The Ring of Fire is a major area of seismic and volcanic activity, forming a large horseshoe around the Pacific Ocean basin. It is characterized by frequent earthquakes, volcanic eruptions, and the presence of numerous active volcanoes.
