An investigation has revealed that Bill Gates has owned major shares in Pfizer since 2002.

He then “coincidentally” bought major shares in BioNTech in September 2019…

He is also the Primary Funder of the MHRA with a current $3 million investment.
In the clinical trial on children 86% suffered an adverse reaction to the Pfizer / BioNTech jab ranging from mild to extremely serious…

But the MHRA still gave emergency use authorisation for the Pfizer / BioNTech jab to be given to children.

That decision just made Bill Gates shares boom and means the MHRA can keep Bill Gates funding.
