1. We think we are experiencing reality but what we are really experiencing is our thinking.
2. The most important choice you make is what you choose to make important.

3. If we really want something, there is always a way.
4. What we decide is less important than how we respond to life.
5. Our intuition already knows what we want to do but we create reasons to keep us locked out.
6. Every emotion we feel is a response to a thought, not an event.
7. Your day doesn't create your mood, your mood creates your day.
8. When you feel a sense of urgency, it's usually a better idea to slow down.
9. No Matter what seems to be going on, you don't have to do anything. Being overwhelmed is just a thought.
10. Everything we do or don't do is simply a choice. To do more, use a system of clarity, structure and boldness of action.
11. We create other people by how we listen to them.
12. When it comes to relationships, if you play to win we have already lost.
13. You can hold thoughts about others but don't let thoughts about others hold you.
14. Financial security is about having the ability to manifest wealth.
15. Think like a creator rather than an employee. Look for ways to serve others rather than feeling a need to be paid.
16. Whatever happens, there is always reason for hope.
17. Hope isn't a promise that something will happen but a license to enjoy the positive consequences if it does.
