Twitter Thread by **Dr Anna Jerzewska**

Dr Anna Jerzewska

@AnnaJerzewska

So many of you have tweeted this excellent ■at me. Thank you.

Couple of things to clarify in case you don't know what these systems are

/1

Over the past 15 days I have not only been running my company as normal but I have been faced with largest threat to its future since it began in 1992. This is #Brexit & here is my thread on just how bad things are getting. 1/26

- Daniel Lambert (Wines).

\U0001f1ea\U0001f1fa\U0001f1feb\U0001f1f7\U0001f3f4\U000e0067\U000e0062\U000e0077\U000e006c\U000e0073\U000e006(@DanielLambert29) \(\frac{January 16, 2021}{\text{2021}} \)

Daniel mentions 2 different systems: EMCS used to register movements of excise goods (wine) and CHIEF for customs.

As excise products are subject to additional controls EMCS was used even when we were in the EU. And it still is now.

/2

https://t.co/0kOziVJsVj

CHIEF is different, it's a customs systems. Reminder, as an EU member we didn't have customs borders with other EU states.

We've now introduced a new customs border so all movements to/from the EU need to be logged in CHIEF AS WELL AS other relevant systems.

/3

CHIEF isn't easy to use. Kudos to Daniel for managing to input directly into it. The additional software helps but yes, there is a cost involved. Or you can pay the broker.

Part of that extra admin cost we've been warning about for the last 5 years

Another issue is that CHIEF will soon (ish) be replaced by CDS. A new version. So even if you learn how to deal with CHIEF now you'll soon need to re-learn on CDS.

/5

And yes, you have to claim the reduced tariff under the UK-EU deal. That's normal.

It's because this reduced tariff is only available for goods that meet rules of origin - which you have to demonstrate.

/6

https://t.co/HYOcacjSGC

Again you would think if there is a FTA, CHIEF would apply it to all imports from that area/ country right? Wrong you have to claim it. Unbelievable! 17/26

— Daniel Lambert (Wines).

 $\label{thm:lower} $$\U0001f1ea\U0001f1fa\U0001f1f7\U0001f3f4\U000e0067\U000e0062\U000e0077\U000e006c\U000e0073\U000e0060\\ (@DanielLambert29) $$\underline{January 16, 2021}$$$

The same way the EU supplier needs to demonstrate their goods need to meet RoOs - hence the Rex number

/7

https://t.co/4PBr0qOchT

So what does this all mean for the consumers? Well to supply the U.K. the exporter need to get a Rex document to prove the origin of their stock to the U.K. government (again, unbelievable). 20/26

— Daniel Lambert (Wines).

 $\label{thm:lower} $$ \u0001f1ea\u0001f1fa\u0001f1f2\u0001f3f4\u000e0067\u000e0062\u000e0077\u000e006c\u000e0073\u000e0060 (@DanielLambert29) $$ \underline{January 16, 2021}$$$

All this, as well as the various codes and abbreviations you need to know to fill in a customs declaration, is totally normal. It's part of trading internationally. But that doesn't mean it's easy.

/8

@DanielLambert29's company was well prepared for 1 Jan. They've obtained all the registrations, stockpiled. Done as much as any business could have under the circumstances.

/9

But the natural consequence of having a new border is that things that used to be very simple, are now complex and require specialised knowledge. And are only possible provided that all the systems work and are updated.

This is an excellent example of how insanely complicated all this is from a business perspective. How it adds to everyone's workload which has to translate into increased costs. For the company and for the consumer.

/11

And again, the scary part is that this is an example of a company that's done well.

There are many businesses out there that are far, far behind and are yet to learn about all that.
