The epic thread ■ on the best "free" resources to start coding and go professional.

Basic Programming and Computing Concepts

CS50 by Harvard
Source: https://t.co/GYXktrSbCw

Prerequisites: None

Probably the best free course for beginners and professionals alike. It goes through the very basics of programming and painlessly shifts to advance topics.

Programming with Python

CS50P by Harvard
Source: https://t.co/vv7YUWWVV8

Prerequisites: CS50 will help but not necessary.

Takes forward the best things of CS50 but in Python. Undoubtedly, the best Python Course you will find on the internet.

Artificial Intelligence (Theory Focused)

CS50's Introduction to Artificial Intelligence with Python by Harvard
Source: https://t.co/ms2c5mxdTC

Prerequisites: CS50P

This is a more theory and concept focused Course that will be your entry point to AI.

AI with Tensorflow

Tensorflow 2.0 Beginner Tutorial by Aladdin Persson
Source: https://t.co/D7hpDOazZA

Prerequisites: CS50P and CS50 AI with Python

The best beginners tutorial on Tensorflow.

Flutter

Free Flutter Course by Vandad Nahavandipoor
Source: https://t.co/As3Bvlr4CT
Prerequisites: CS50 will help

The best and complete professional Flutter Course out there!! Also lookout for his State Management Tutorials.

WebDev

MDN Web Docs
Source: https://t.co/BqJGYqgDOt
Prerequisites: CS50 will help but not necessary.

Ask any veteran WebDev where they learned web technology, 8/10 will say MDN. The best free resource hub to learn HTML, CSS, Javascript and also advance web frameworks.

Web3 and Blockchain Technology

Buildspace
Source: https://t.co/Mf6EtcliQp
Requisites: Basic Web Dev and React.

The most complete tutorial on Solana and Ethereum Blockchain + a lively community.

That's the end but always remember, Gain Knowledge and "BUILD". That's the key to success. Follow me for more threads and like to motivate me and retweet to share knowledge.
