The average salary for a Data Scientist is \$117,000.

Want to become a Google Certified Data Scientist?

Here are 4 free courses from Google you don't want to miss:

1. Learn Python basics for data analysis

This course is designed to teach you the fundamentals of the Python programming language, especially for the purpose of data analysis.

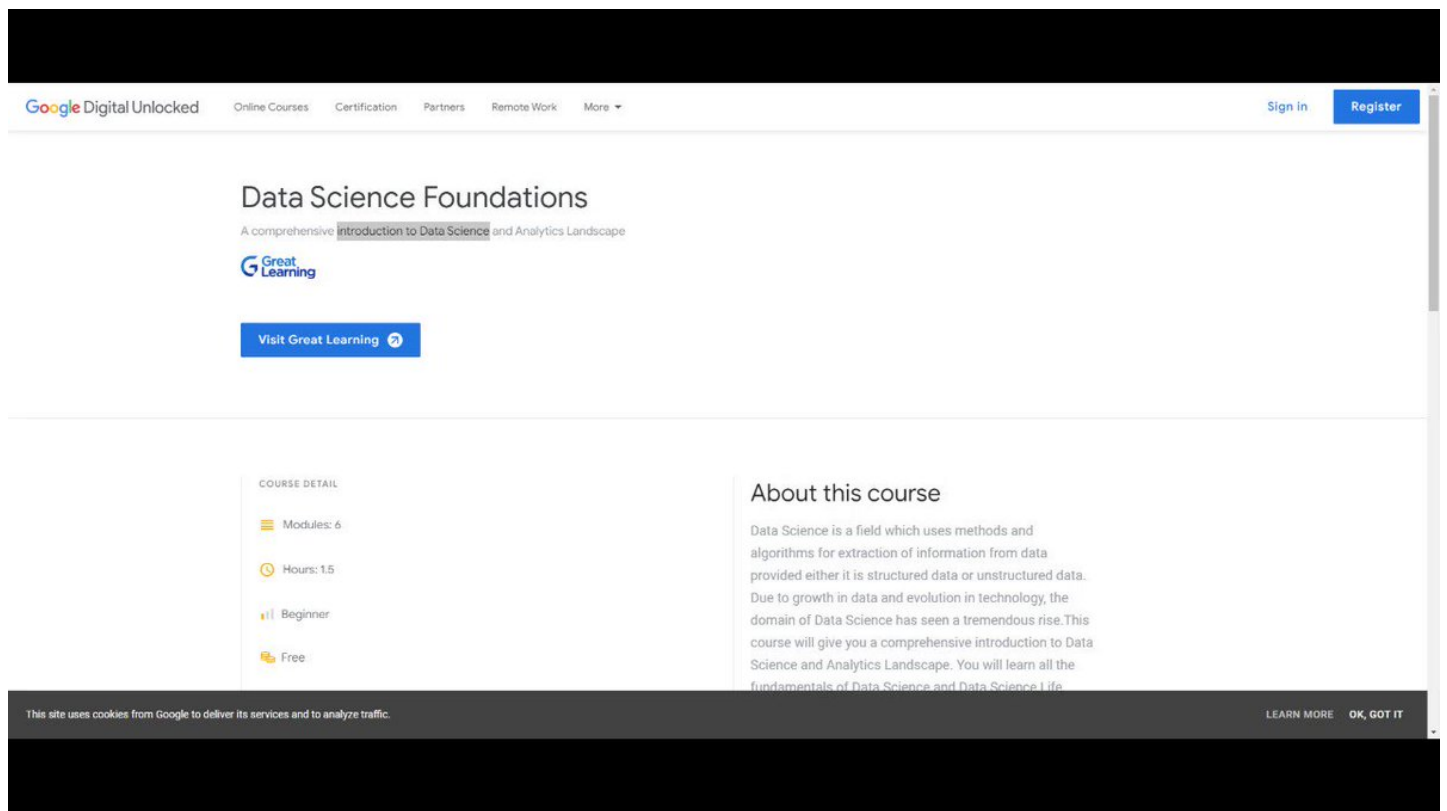

■ <https://t.co/q8SIIUytbM>

The screenshot shows the Google Digital Unlocked website. At the top, there's a navigation bar with links for 'Online Courses', 'Certification', 'Partners', 'Remote Work', and 'More'. On the right, there are 'Sign in' and 'Register' buttons. The main content area features the course title 'Learn Python basics for data analysis' with a subtitle 'Find out how rewarding programming in Python can be! Learn how to use and write functions, practice with data analysis, and work on your first algorithm!'. Below this is a 'Visit OpenClassrooms' button. To the right is a video player showing a woman speaking, with a red play button overlay. Below the video player, there's a 'Watch on YouTube' button. On the left side, under 'COURSE DETAIL', it lists 'Modules: 4', 'Hours: 12', and 'Beginner' level. On the right side, under 'About this course', it describes the course content: 'This course is designed to teach you the fundamentals of the Python programming language, especially for the purpose of data analysis. We'll look at how to structure and group information in your program with data types, use programming logic so that your program does what you want it to and how to use and write functions so that...'. At the bottom, there's a cookie notice: 'This site uses cookies from Google to deliver its services and to analyze traffic.' and buttons for 'LEARN MORE' and 'OK, GOT IT'.

2. Introduction to Data Science

This course will give you a comprehensive introduction to Data Science and Analytics Landscape.

3. Data Science with Python

This Data Science with Python program provides learners with a complete understanding of data analytics tools & techniques.

This program is an ideal kickstarter for anyone looking to become a data scientist today.

About this course

This Data Science with Python program provides learners with a complete understanding of data analytics tools & techniques. Getting started with Python can help you gain knowledge on data analysis, visualization, NumPy, SciPy, web scraping, and natural language processing. This program is an ideal kickstarter for anyone looking to become a data scientist today.

This site uses cookies from Google to deliver its services and to analyze traffic.

About this course

This course teaches the basics of machine learning through a series of lessons that include video lectures from researchers at Google, text written specifically for newcomers to ML, interactive visualizations of algorithms in action and real-world case studies. While learning new concepts, you'll immediately put them into practice with coding exercises that walk you through implementing models in TensorFlow, an open-source machine intelligence library.

This site uses cookies from Google to deliver its services and to analyze traffic.
