@Metabo_PhD

Last week, Dr. Theresa Tam @CPHO_Canada & the Ontario Science table released their latest model that garnered criticism, ridicule, & shame at an international level. The now famous Covid Erection had risen ■■

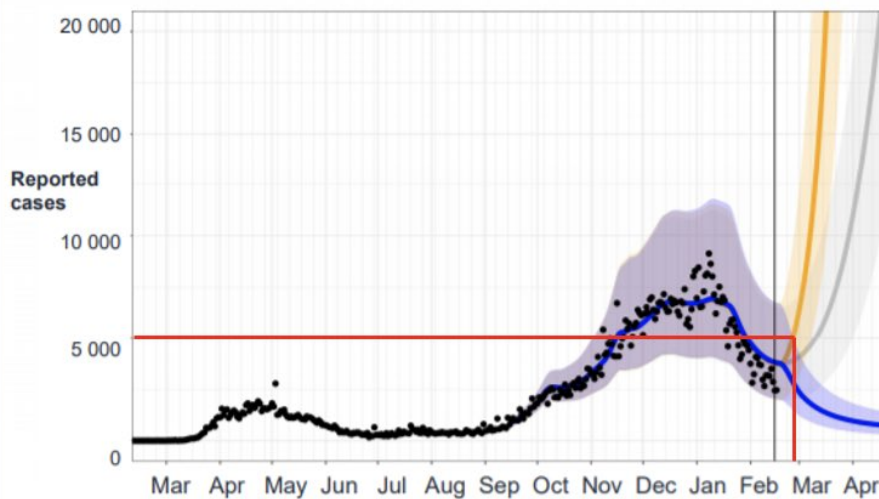

#Canada #Ontario #cdnpoli #onpoli #COVID19

The Covid Erection model predicted ~5000 cases by the end of February. Well, now that we're at February's end, Ontario recorded ~1250 cases. It would seem that the Covid Erection encountered some...ahem, erectile dysfunction ■

#Canada #Ontario #cdnpoli #onpoli

New longer-range forecast that includes Variants of Concern indicates a strong resurgence unless we have stringent measures and strict adherence

With spread of VOC and further lifting of public health measures, the epidemic is forecast to resurgence rapidly - **Orange line**

With spread of VOC, current public health measures will be insufficient, and epidemic resurgence is forecast – Grey line

With spread of VOC and if enhanced, combined public health measures and individual precautions are implemented, epidemic control is forecast – **Blue line**

Data as of February 16, 2021

Notes: Variants of concern introduced in mid-Dec (~1 week prior to first detected case in Canada) at very low prevalence. Variants of concern assumed to be 50% more transmissible compared to wildtype. The growth rates AND replacement rate are negatively correlated with the strength of public health measures in place.

Since the Covid Election model had become flaccid, Dr. Tam @CPHO_Canada needed another story to continue the propaganda of fear; public health by dread & distress. So she came out today to say that Canada was experiencing 75X more cases than the spring peak

NEWS 1130 
@NEWS1130

Canada's chief public health officer says the daily COVID-19 case counts are nearly 75 times higher than they were at the peak of the first wave of the pandemic last spring. bit.ly/3dQ7xz6

1:24 PM · 2021-02-26 · [Salesforce - Social Studio](#)

The spring peak in Canada had ~2000 cases. Today, Canada reported ~3000 cases. That would be 1.5X more cases, not 75X. Dr. Tam [@CPHO_Canada](#) just inflated the case counts by only 50X, or what we call here in Canada, by a Fisman

#Canada #cdnpoli #Ontario #onpoli #COVID19

Canada (& Ontario's) public health officials & politicians have thoroughly embarrassed the discipline of public health & made mockery of the field of medicine. From the MDs fake crying in the news to the high school teachers pretending to be biostatisticians. We've become a joke.

STEP RIGHT UP
