**1/ Let’s talk about vaccine misinformation, @cdcgov style. On Friday the CDC ran a report titled “Reduction in COVID-19 Patients Requiring Mechanical Ventilation Following Implementation of a National COVID-19 Vaccination Program.”**

**The headline is a lie. No other word will do...**

2/ How do I know? From the data in the report itself.

The report, written by three Israeli scientists, intentionally tries to obscure the facts it presents (I’m not entirely sure why it was written at all), but they come out anyway to anyone paying attention...

3/ Your first clue the authors have no interest in presenting the facts honestly comes when they refuse simply to divulge how many people were on ventilators before and after the start of vaccinations on Dec. 19. Instead they focus on the ratio of patients in two age groups...
