Italian researchers: vaccines will not work against SARSCoV2 because this virus does not only replicate in human cells like other viruses, this one replicates through bacteria too. This is the fundamental reason why antibiotics work & vaccines will not:

Here is the Italian-EU scientific study indicating SARSCoV2 replicates in bacteria, not only human cells, and that is why antibiotics work and these vaccines will not:

"The preliminary results suggest that SARS-CoV-2 replicates in bacterial growth"
