1/ Thread – THE YEAR OF THE RAT

“15 days to slow the spread” began one year ago. It was March 2020, the Year of the Rat. Never was any year more fitting of the name. Never in history have the people been betrayed so callously, flagrantly and absolutely by their alleged leaders.

2/ They were betrayed by their WHO representatives,
https://t.co/MmAJ5Tqq7N

3/ and their national health directors.

4/ They were betrayed by medical journals,
https://t.co/qjUki3DF0t

> Despite ignorance by many in the West, this article by The Lancet is a powerful endorsement of China\u2019s successful pandemic response. Hate to read stories by those paparazzi journalists who are experts at spinning but have little knowledge of science. https://t.co/Q8rKwwTPsI pic.twitter.com/436BEmx9nl

> Can now confirm: Eric Feigl-Ding, the chief COVID-19 panic salesman on social media, quietly moved his family to Austria in the Fall so that his kid could attend school in person.
>
> Yet Feigl-Ding has been a relentless proponent for school closures here in the United States.

> 215 million Americans would need to be infected with the coronavirus to reach herd immunity, a strategy Pres. Trump has said would make the virus "go away."

> This strategy would result in 6,385,500 deaths based on the current US fatality rate of 2.97%. https://t.co/5beVfRxwrx

> If we\u2019ve never seen such a respiratory virus, it\u2019s because it doesn\u2019t exist. Highly transmissible respiratory viruses can not be contained or eliminated. @mvankerkhove Stop spreading misinformation and treating people as fools. You know you are lying.
