This is a homophobic eugenics campaign conducted on an industrial level with a vigour and enthusiasm redolent of a busy abattoir

Frankly why aren't you in a state of moral panic?

You rather ought to be

TAVISTOCK CLINIC SCANDAL IS BIGGER THAN THE CASS REVIEW:

The Tavistock clinic ignored evidence that **97.5%** of children seeking sex changes had autism, depression or other problems that might have explained their unhappiness, in, ***Time to Think:*** *The Inside Story of the Collapse of the Tavistock's Gender Service for Children* by Hannah Barnes

- **ONLY 2.5%** of the children seen at the clinic had no known associated problems.
- **70% of referrals** had **MORE than 5** associated features/ comorbidities such as abuse, depression, self-harm, suicide attempts, anxiety, eating disorders, ADHD or bullying
- **35% of referrals ASD** (Autistic Spectrum Disorder) - YET Less than **2%** of the children in the **UK** have an ASD
- **25% of referrals** had spent time in care compared with **0.67%** of the general population.
- Children referred were **10x times** more likely than the national average to have a **registered sex offender as a parent**
- **42% of referrals** had lost a parent through death or separation
- A clinical psychologist was **"horrified"** that highly vulnerable children were **wrongly being given irreversible drug treatments** following referral by the Tavistock, but discussion of the subject was shut down by colleagues.
- Children who might not have identified as trans were treated as **"collateral damage"** by clinicians who labelled doubters **"transphobic"**
