Since Trump lawyers are searching other properties & the fact they found TS docs in his desk among other places, I thought it might show that; at least the 'idea' of concealing stolen TS docs w Ivana wasn't as far fetched as some may believe. (I know I misspelled Casket)

The Case for Exhuming Ivana! If she's even in there.

Avg. Metal Casket Dimensions
Length: 78 inches
Width: 23 inches
Height: 16 to 24 inches

10 Ream Case of Copy paper 8.5 x 11 weighs 44 lbs
The average sized casket can hold 8 cases= 352 lbs
Average metal casket weighs 200 lbs total weigh= 552 lbs
10" adult Urn weighs about 10 lbs Total weigh: 562 lbs
9 pall bearers would have to carry 62.4 lbs ea.
10" adult Urn weighs about 10 lbs
If you only have 4 cases of paper subtract 176 lbs
Total weight now is 386 lbs divided 9 pall bearers=
Approximately 42.8 lbs per PB to carry.
I think it's worth exhuming Ivana.
