My prediction: in addition to the conventional activity in Ukraine, I expect there is covert action. I strongly suspect we are conducting covert activities that directly confront Russian forces in Ukraine.

One of the biggest lessons we learned coming out of the war on terror, is the use of unconventional and covert operations. One of the first forces in to Afghanistan was the CIA. From discussions and my own personal experience, I believe this is what is happening in Ukraine.

One of the largest tells is the lack of videos that show actual javelin or other specific weapons combat. The Ukrainians are releasing propaganda videos ad nauseam, except here, where they are excruciatingly disciplined.

Lastly, I have received several very clear warnings, from what I expect are Ukrainian intelligence, on discussing any relationship between US clandestine forces and Ukraine.

Hi Naveed —

We know that you're well-informed and a good communicator, but...

Please give more consideration as to whether it's in the best interest of the USA and its allies (especially Ukraine) for you to be speculating about what the USA might or might not be doing behind the scenes in Ukraine. The possible use of US-supplied drones or involvement of US undercover/irregular forces is interesting — but having someone of your background (particularly your status as a Navy Reserve Intelligence Officer, a "double agent", and a published author) simply increases risks to all those who support the Ukrainians and gives the Russians another excuse to go after NATO and the USA.
