**Watch the skies. Moscow is sealed off. Something is going down or did go down.**

Its not just the ring road. Something is afoot. Jungle drums are pounding. Don't have details but did anyone see a very short person in a burqa leaving in a hurry?

Yesterdays' events could be mundane but serious people are asking serious questions so I bring it up. Maybe just certain countries pumping notional ideas into the social media sphere. Either way, worth watching

Exclusive: DHS discovers a secret tunnel entrance that leads all the way to Red Square. They have no idea who would use it.

FYI my indicators are not Telegram posts. I am all for normalizing the idea of a coup but intel networks are straining to put together a cohesive report.

FYI All the "Putin Assassination Attempt" stories the media and tabloids are trying to rework come from a single posting on the General SVR Telegram channel.
