Patricia Jayne that is horrible.
Im sure lots of people are in your situation. Glad you are better. No body is gonna pay our bills for us. We have to work. Wonder what employers will do if its ever mandatory and half their workers have to stay home cause they not feeling good? Just a thought

A 58 year old nurse I've know for 15 years died today, I found her in her room in bed, she was pretty healthy, she was semi retired......She received the vaccine a week and a half ago, I'll be doing some serious investigation, as I don't believe it was her time today. gutted is not the word.

I got the Pfizer vaccination last Friday. Friday night I had a sore arm and headache. Saturday I had a rollercoaster temp(mostly low), headache, body aches, lethargy, Sunday I had all the same symptoms and add a slight cough. Monday morning my sinuses felt like they were on fire and I lost taste and smell in addition to all the other symptoms I was already experiencing. I got tested on Monday afternoon. Got a positive test result by Tuesday afternoon. I've been told by doctors that you can't get a positive test result from the vaccine. I've been told by RN's that several people they know who were vaccinated, became covid positive in the days to follow. Not sure what to believe at this point but I am currently at home with covid, feeling like complete shit. This is my experience. 🕰

Covid-19 Vaccinati... Q

Tara Sekikawa

Dec 27, 2020 · 3

I went to work today and ended up in the ER. Thank god I work at a hospital. I'm positive this episode is from the Covid19 vaccine. I had tachycardia. My heart beat was 239. I haven't felt right since I got the injection on Tuesday. I have had a headache ever since. I will not be getting the 2nd shot. This was my experience with the vaccine I felt I should share it.

"San Diego Vaccination Super

Station" event goes terribly wrong as many Moderna vaccine recipients are carted away in ambulances following vaccine injury.

Eyewitnesses report far more injuries than the "6" mentioned in the story.

@SupFletcher is to blame.

Unexpected String of Allergic Reactions Causes Delays at 'Vaccination Super Station'... nbcsandiego.com

My father who has dementia and is in care had the Pfizer first vaccine shot last week, by the weekend him and 2 others were in hospital. He was found collapsed and taken to hospital.

His symptoms are shortness of breath, cannot walk, legs shaking and incontinent, he was not this way before and other than the dementia of good health generally.

They ran 2 negative PCR tests at hospital, but then did bloods and said they found Covid so have stuck him in a Covid ward. He is eating, but cannot walk still, they of course say this is down to Covid which in my opinion is 100% not.
