Lowest volume and a very tight day today.
Previously such consolidation was followed by a strong move of minimum 10% and continued to rally further.
Can be a sweet spot to enter today.

Investment wise solid stock for longterm

IEX
CMP: 377

Vert tight consolidation with lowest volumes since last 4 months. Explosive move expected next week.

Can be bought above 380.60 pic.twitter.com/lrnfLvBged
