5 amazing websites that will blow the mind of a developer. Definitely check them out

■■■

1■■■ Animation generator

- Dead simple visual tools to help you generate CSS for your projects.

■ <https://t.co/IFmIEgDiVY>

2■■■ Neural Network Visualizer

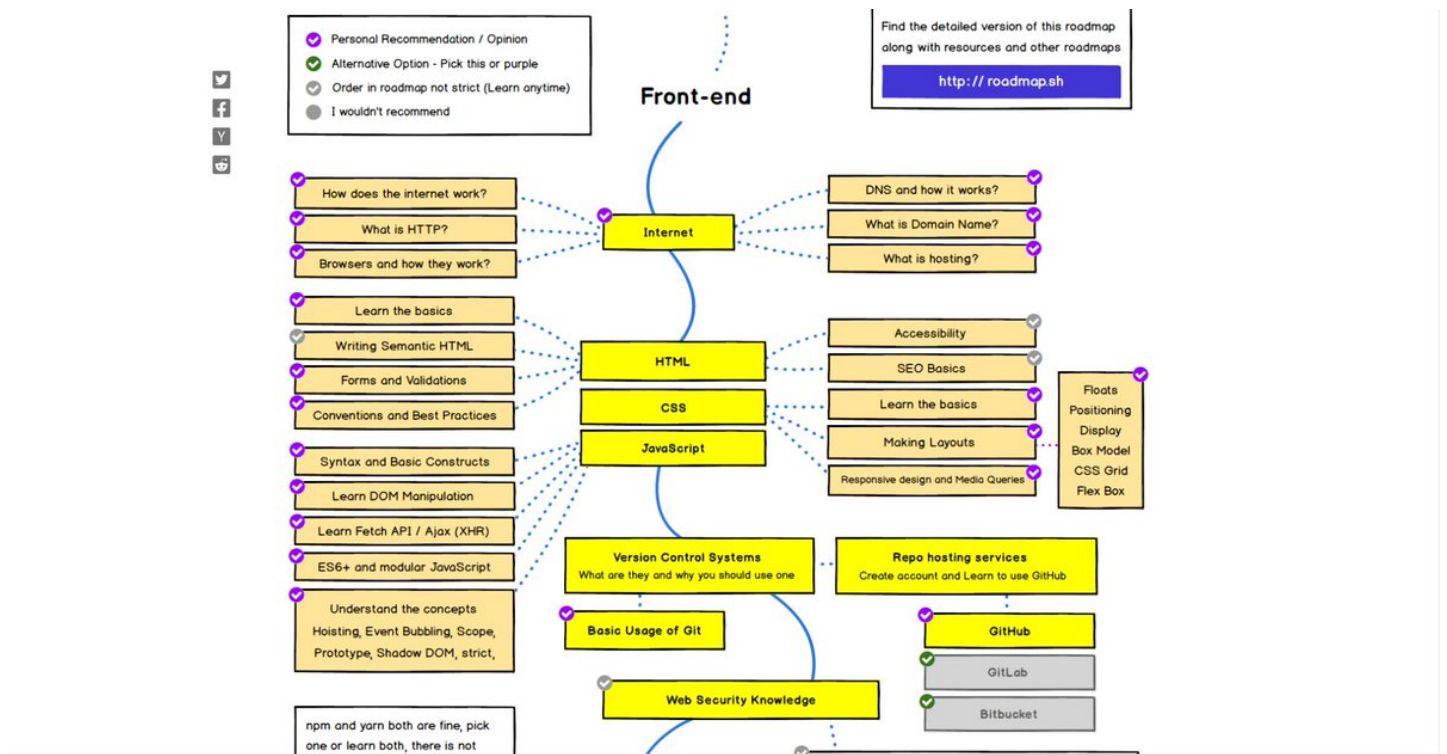

- Deep playground is an interactive visualization of neural networks, written in TypeScript using d3.js.

The screenshot displays the 'Blockchain Demo' application interface. At the top right, there is a red button labeled 'START DEMO'. The main heading is 'BLOCKCHAIN' in large, bold, black letters. Below this, a white card contains the 'GENESIS BLOCK' information. It features a 'DATA' field with the text 'Welcome to Blockchain Demo 2.0!' and a 'PREVIOUS HASH' field with a green border containing the hash '000dc75a315c77a1f9c99fb6247d03dd18ac52632d7dc6a9920261d8109b37cf'. The 'HASH' field is also highlighted with a green border. The 'GENESIS BLOCK' is dated 'on Tue, 17 Oct 2017 19:53:20 GMT' and has a value of '604'. Below the main card, there is a smaller white card with a 'DATA' field and a red button labeled '+ ADD NEW BLOCK'. At the bottom, there is a 'SHARE' button with social media icons and a 'CONNECT' button with a heart icon.

Concatenation vs Coercion

```
// JS tries to coerce a string into a number in operations with string and number
// Addition operator is an exception, here it coerces the number into a string and co
const x = "11" + 1;
const y = "11" - 1;

console.log(x); // "111"
console.log(y); // 10
```
