The screenshot shows the 'CSS Accordion Slider Generator' web application. On the left is a 'Settings' panel with sliders for: Number of decks (3), Title height (65px), Title font size (15px), Content padding (30px), Content height (280px), Border radius (8px), and Border size (1px). Below settings are 'More Developer Tools' for ButtonX and palette.ninja. The main area features a title, a 'How it works?' section with bullet points, and a preview of an accordion with two 'Title' items. On the right, there are 'class name' and 'Select HTML' buttons, followed by a code editor showing HTML and CSS code. The CSS code includes styles for the accordion container, select buttons, titles, and content.

```
<div class="accordion">
  <input type="radio" name="select" class="accordion-select" checked="" />
  <div class="accordion-title"><span>Title</span></div>
  <div class="accordion-content">Content</div>
  <input type="radio" name="select" class="accordion-select" />
  <div class="accordion-title"><span>Title</span></div>
  <div class="accordion-content">Content</div>
  <input type="radio" name="select" class="accordion-select" />
  <div class="accordion-title"><span>Title</span></div>
  <div class="accordion-content">Content</div>
</div>
```

```
.accordion {
  box-sizing: border-box;
  display: flex;
  font-family: Arial, Helvetica, sans-serif;
  overflow: hidden;
  width: 100%;
}

.accordion-select {
  cursor: pointer;
  margin: 0;
  opacity: 0;
  z-index: 1;
}

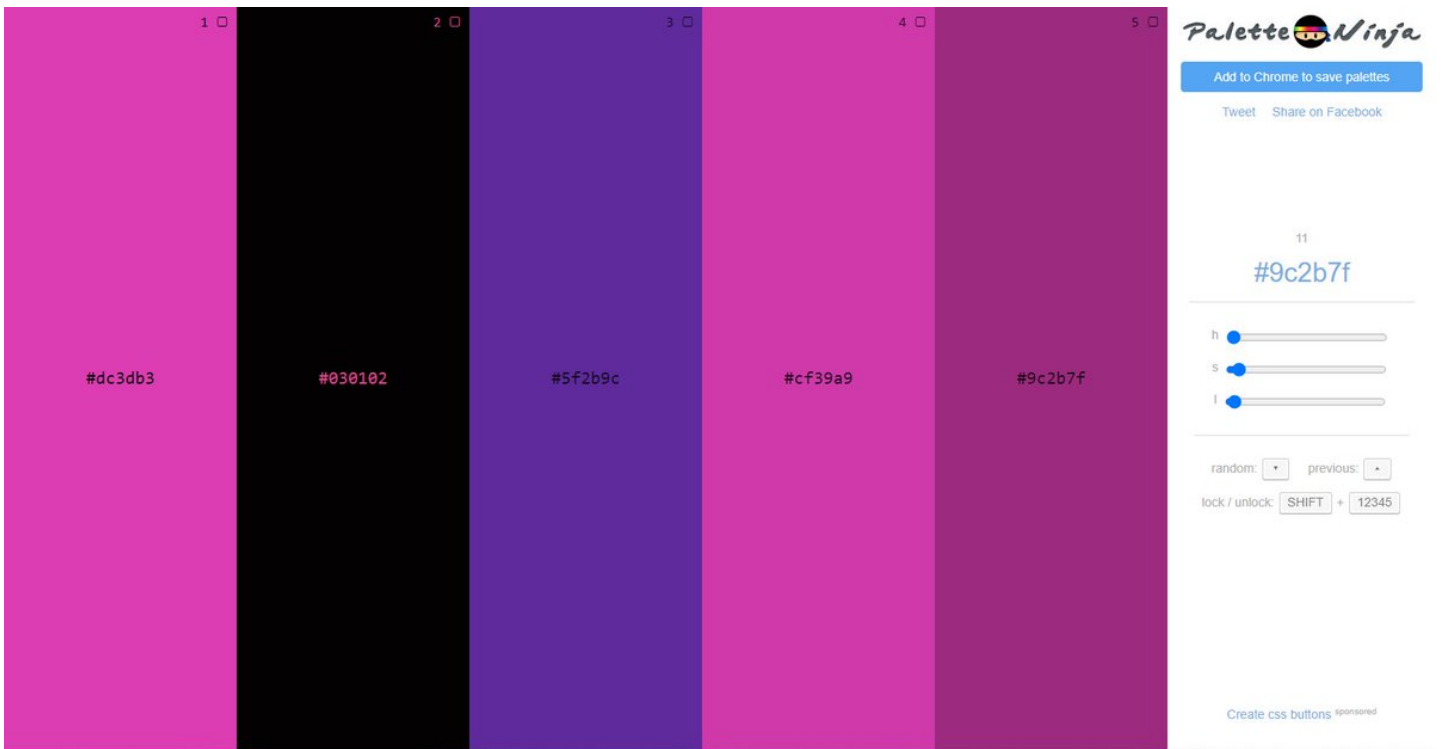

.accordion-title {
  position: relative;
}

.accordion-title:not(:nth-last-child(2))::after {
  border: 1px solid transparent;
  bottom: 0;
  content: '';
  left: 0;
  position: absolute;
```
