Wanna Learn Programming (Python, Java, Swift, and C++) for free?

Here are some of the best freely available online tutorials you can learn coding from. A Thread■

Introduction into all of the core concepts in python. Course developed by @mike_dane
https://t.co/9xZX6YVgvd

Python for beginners - (includes machine learning & web development projects). Course created and developed by Mosh Hamedani:
https://t.co/gN1Lu29PAu

Advanced computer vision using Python. You will learn state of the art computer vision techniques by building five projects with libraries such as OpenCV and Mediapipe. Course created by Murtaza Hassan:
https://t.co/LkCu882EzU

C++ full basic Tutorial series by Cave of Programming (playlist):
https://t.co/6uA6UggCf7

C++ Tutorial From Basic to Advance merged by Extern code originally taken from NewBoston:

https://t.co/ZrwDg0FdRq

Java Course 1:
Java is a general-purpose programming language. Learn how to program in Java in this full tutorial course. This is a complete Java course meant for absolute beginners. Course created by Tech with Tim:
https://t.co/SEEGAALh29

Course 2:
Complete Java tutorial for absolute beginners from Introduction to map interface by @navinreddy20
https://t.co/af8vMAnrsz

Data Structures and Algorithms - Advance Java programming Tutorial - from string methods to making instant messenger app using Java:
https://t.co/7QBLMIUwoI

Swift Programming Tutorial for Beginners (Full Tutorial). Created by CodeWithChris:
https://t.co/g0zn3diasV

Advanced Swift Tricks: Custom Array Extensions created by Brian at Lets Build That App:
https://t.co/bXJ45DKquF

Thank you so much for reading. I keep making threads on multiple disciplines of theoretical and experimental sciences and mathematics providing free resource materials. You can check out my thread on AI and Machine learning here:
