Copper - Weekly chart

Looking weak, sell below 732 SL 753

Next band of support 714-685

Copper - Daily

Cluster of supports in the area 685-714

RSI is hinting weakness. Break below 680 will invite more downside.

Copper - Monthly

650 previous major bottom.

Close below 680 can expect 630-575-520

500-520 is multiyear breakout. 8/10 times such multi year breakouts are retested.

Too early to comment but keep an eye on 730 then 680 these levels can decide next trend
