#CopperFutures

On each of the last 3 occasions, #Copper has given a good rally after touching 40DEMA. It might just do it again.

Wave wise we are in subwave v of 5 and have likely done a minor wave ii today. What will follow is an impulsive subwave iii of 5.

@nishkumar1977

Subwave v of 5 yet to start. We are still doing wave iv correction which can get over today.
