So, above Rs 250 Cr market cap (thats where I like to play mostly), out of 1168 companies, change in last 1 week

> 40% correction : 6 to 7%

> 30% correction : 18 to 21%

> 20% correction : 45 to 57%

Bulk of correction between 20-30% from highs

So, above Rs 250 Cr market cap (thats where I like to play mostly), out of 1168 companies:

> 40% correction : 6% companies

> 30% correction : 18% companies

> 20% correction : 45% companies

Not bad. So, almost every second company is down by 20% from life time high
