1/It seems apparent that the rulings in my case & was the Travis judiciary has allowed/ignored us related to the fear/coercion of #AlexJones and of his audience and employees who harassJudges & jurors.

.@FBI pls investigate the 3.07 violations, donations & defamation/slander..

> What #AlexJones says on #Infowars doesn't just stay on the internet. It incites violence IRL!

2/I am aware that such coercion & perception has had real impact on my children's lives & these cases Alex files against me.

Alex's counsel has threatened me "accidentally" & tells my representation & others lies to coerce them to stay on team good-ol-boy$.

3/Why doesn't the Court protect my kids? I filed a Temporary Restraining Order before the Thanksgiving that any judge should immediately grant: #AlexJones publicly intoxicated/getting wasted while he is enjoined (disallowed to) drink while he has my kids. The Court must fear him

4/No judge may be persuaded by coercion or benefits of ruling the way their main donors demand. No litigant can coerce judges or witnesses. Witness tampering very clear, documented by probative evidence as fraud in Alex's lawsuits against me. .@fbi investigate pls
