It's a fact that very few people know about White Rose.
A group of students that spoke out about the Nazi regime which ultimately ended with their imprisonment or execution.

Why is this?

Is it because everyday Germans were embarrassed by what they had allowed to happen.

Regardless of what Covid is or isn't we've e allowed our Government unprecedented powers to curtail our freedoms.

They have chosen polices that put care home residents at risk, ignored all other health concerns and collapsed the economy

For what?

A virus with a 0.27 IFR.

They profit from our misery.

They are unaccountable for their actions.

With the aid of the bought media they have covered up deaths under the guise of Covid

It is time we unite and learn from the mistakes of 1940s everyday Germans

They lived to regret fighting back

The cycle is endless

First the vulnerable, then all adults then the children and then it's yearly.

Then non compliance will be punished

Then you are no longer free

Yes people have died from a respitory virus named Covid but they show no care for non Covid excess deaths

None

About 50,000 non Covid excess deaths at home in England & Wales over the last 12 months and not a word from our PM

Is this a man that cares about our health or does he care about his ties to Pharma and the elites.

It's a select club and we are not in it.

Decide your own fate
