With the inching up of reaction lows, the targets are placed at \$125 and \$134.

In a different case scenario, Let's not rule out the possibility- If the price continues to sustain above the level of \$104, Might see a hit towards the level of \$150 as well. [#CrudeOil](#) [pic.twitter.com/p52TnRkBgC](https://twitter.com/p52TnRkBgC)
