A primer on how to use @coingecko for your crypto data/research/trading needs.

Share it with a friend who needs it!

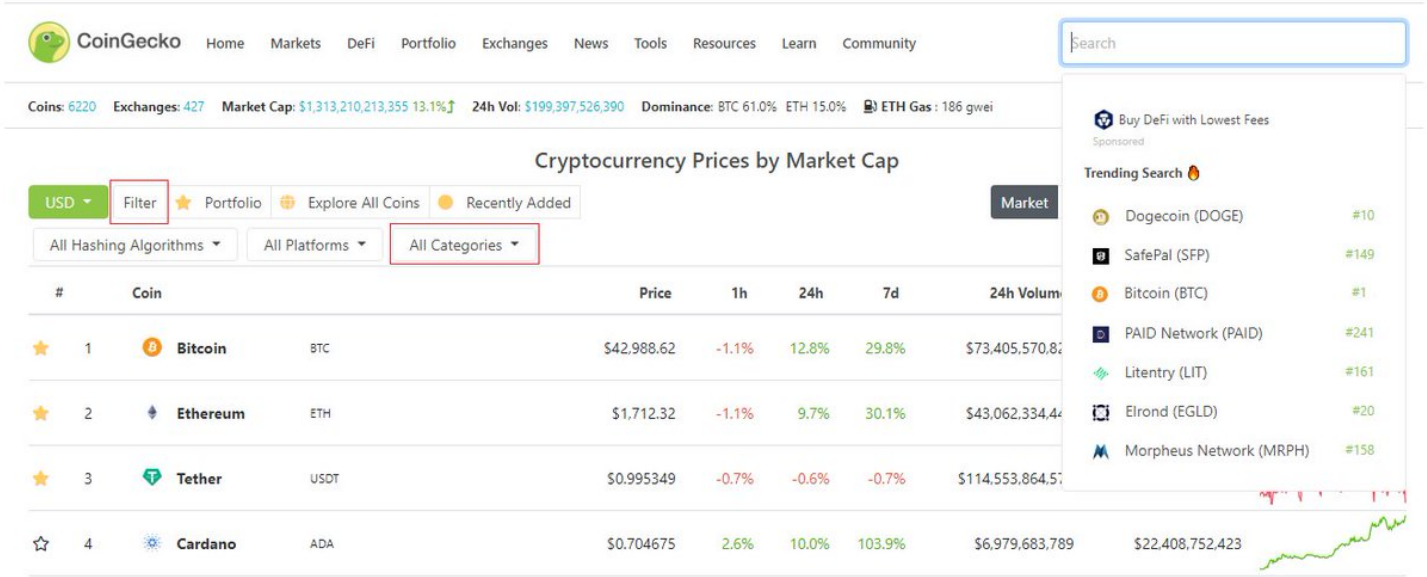

1/ Getting started with crypto and want to check prices/projects? https://t.co/LFnk4vukxj has info on just about every crypto you'll need :)

#	Coin		Price	1h	24h	7d	24h Volume	Mkt Cap	Last 7 Days
1	Bitcoin	BTC	$43,022.78	-0.8%	13.5%	30.0%	$71,957,263,997	$801,226,359,664	
2	Ethereum	ETH	$1,713.23	-0.9%	9.9%	30.0%	$43,080,186,390	$196,369,195,309	
3	Tether	USDT	$0.996140	-0.7%	-0.6%	-0.7%	$114,644,884,387	$28,666,750,763

2/ Search over 6000+ cryptocurrencies available on the market. You can see what's trending in the space as well.

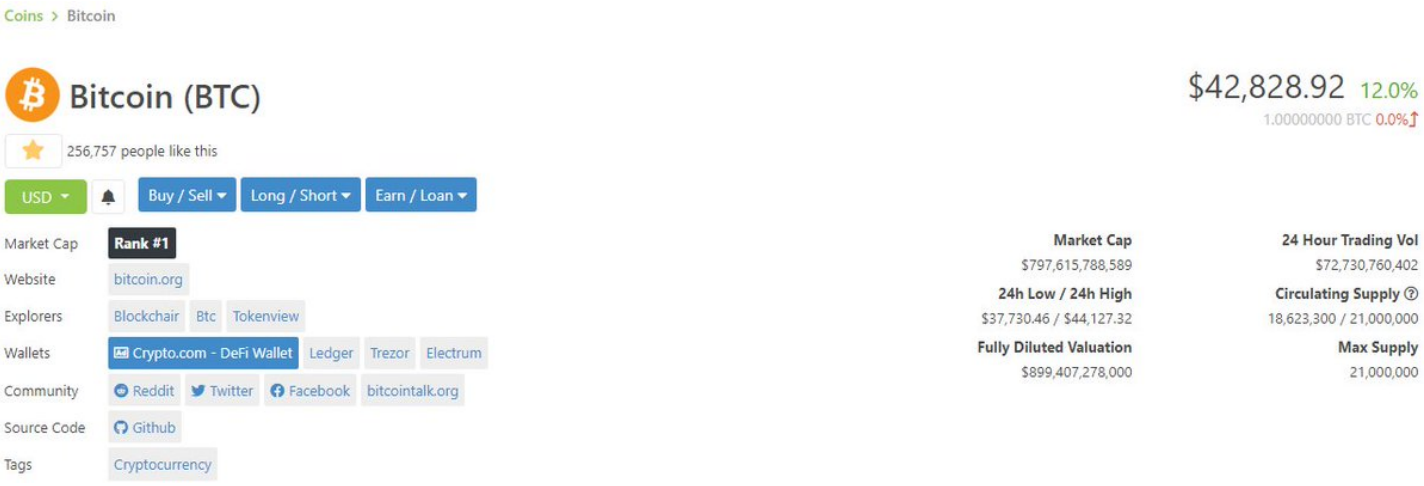

Researching by categories? Filter (left side) -> Select categories -> DeFi, DOT ecosystem, Exchange-based tokens, NFTs - anything!

3/ Lets say you're looking at #Bitcoin https://t.co/g205lj03pG

At a glance you get:
- Price
- Mkt Capitalization (valuation)
- Circulating/Total supply
- 24h trading volume
- Links to websites, social media, block explorers
- Calculator

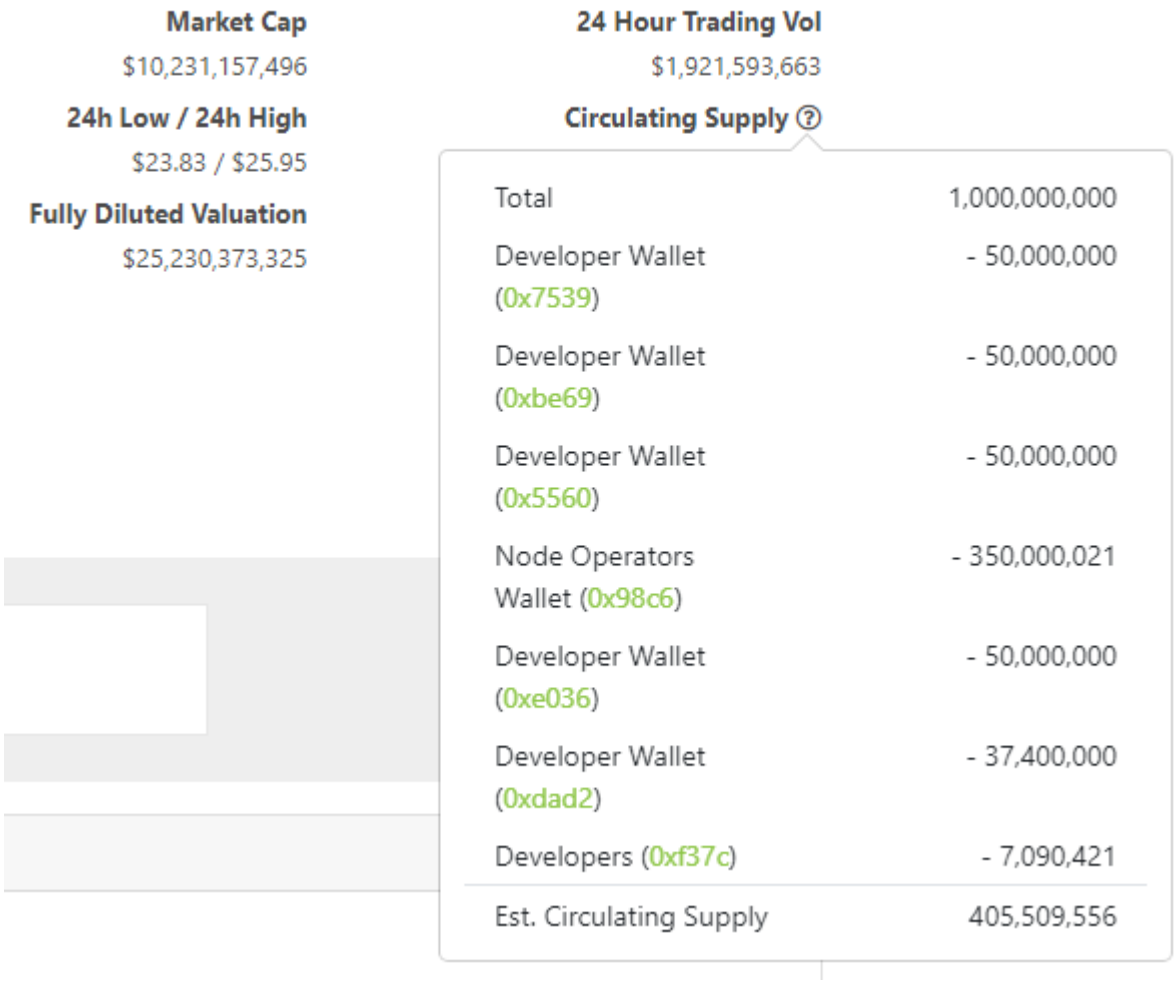

Next - check valuation?

4/ Market cap is used to rank coins, and we'll show you how its calculated - Hover over Circulating Supply (?) for breakdown.

Note: used @chainlink as example here - https://t.co/Jc46fe79Ag

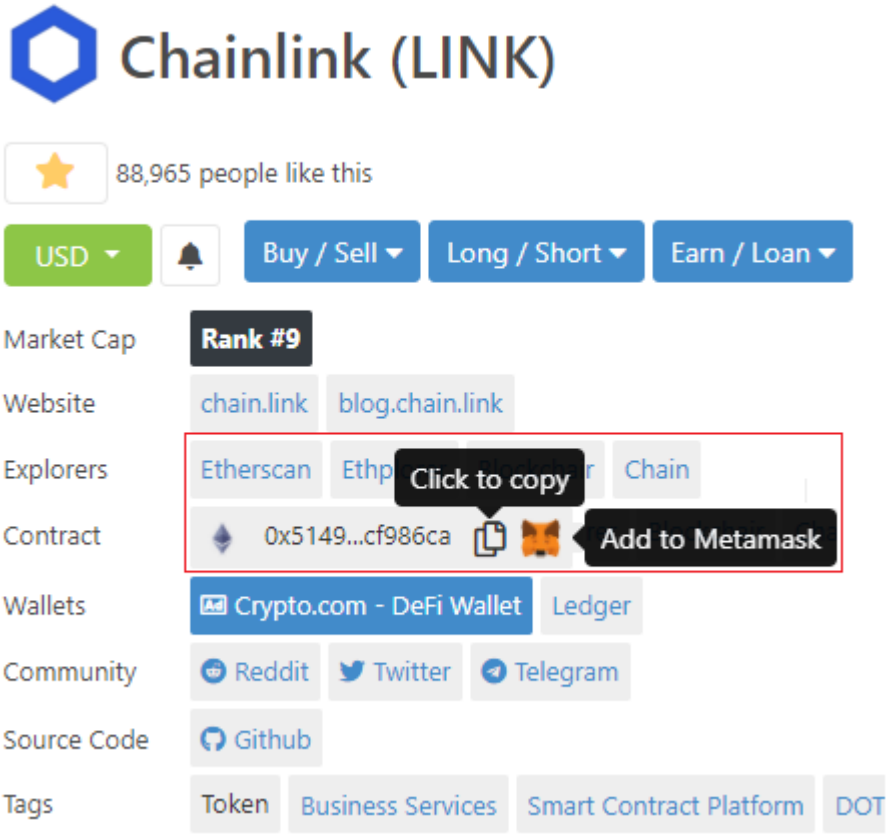

While MC is important also consider product fit, narrative, team, community etc.

5/ If you're trading on AMMs like @Uniswap or @SushiSwap, you can copy the contract address directly to your clipboard.

Using @metamask_io? Add the token directly so it shows as one of the "Assets" that you own in the wallet.

See: https://t.co/94XihMf5oz

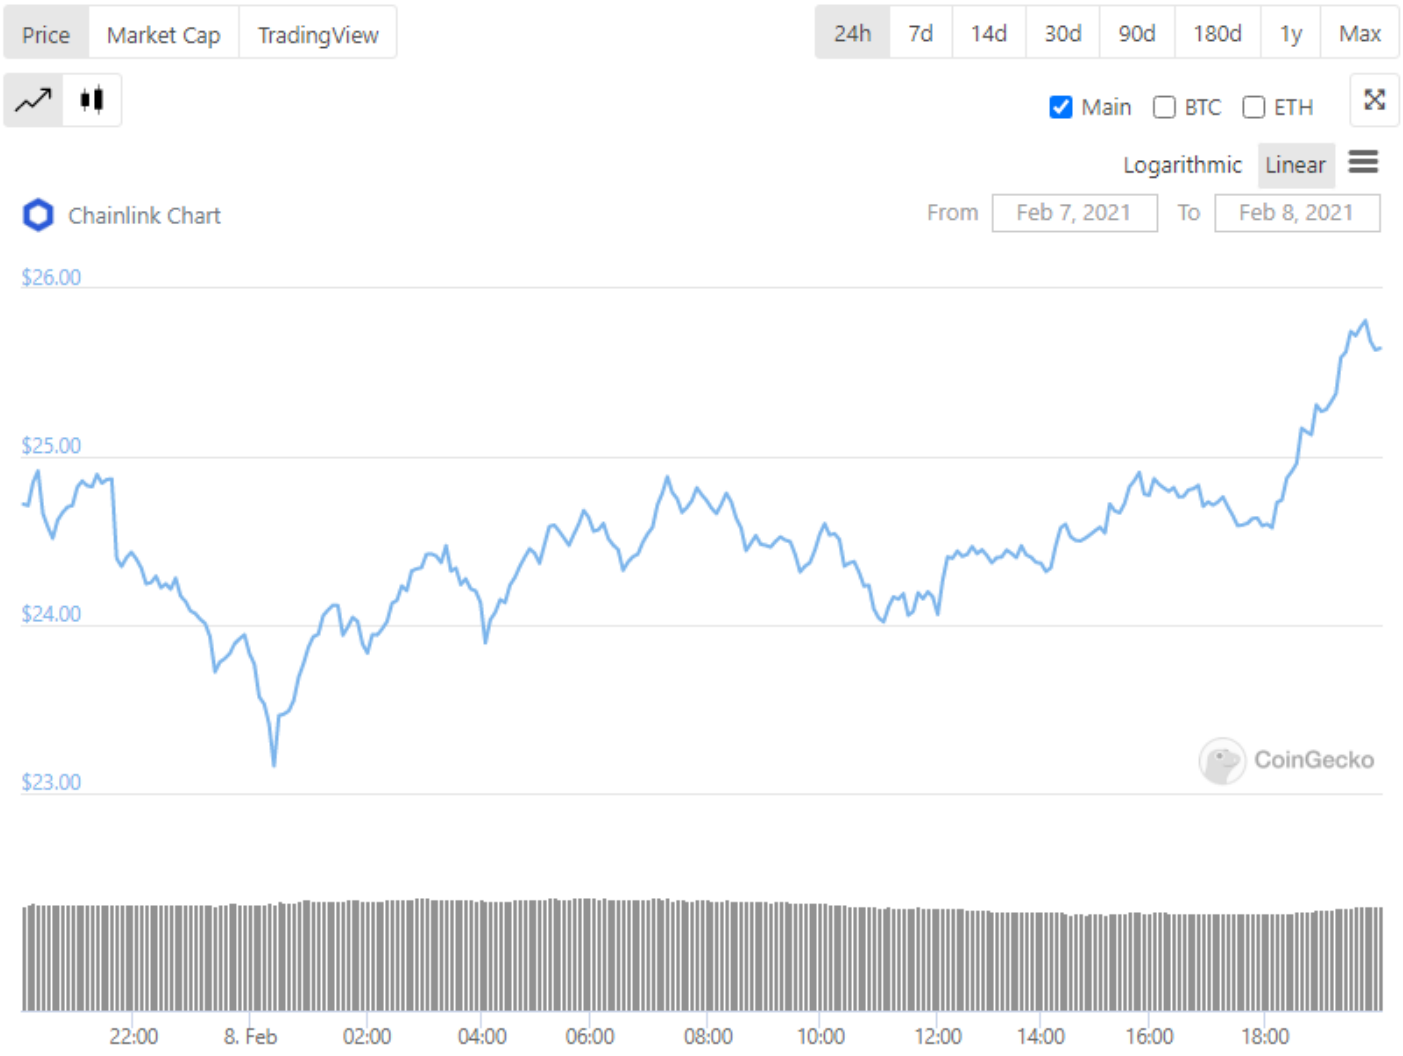

> Introducing an effortless way to add tokens to your @metamask_io wallet \U0001f4e5
>
> Skip the hassle of copying/pasting contract addresses to your wallet. Add an asset and it'll appear in your wallet with just a click - tap the \U0001f98a and try it out for yourself! pic.twitter.com/u26BA29ubs

6/ Scrolling down a little bit more, you'll have a chart for:

- Price
- Volume
- Market Cap
- OHLC data
- @Tradingview (where supported)

Data that extends as far back as we have to help you see the market trends :)

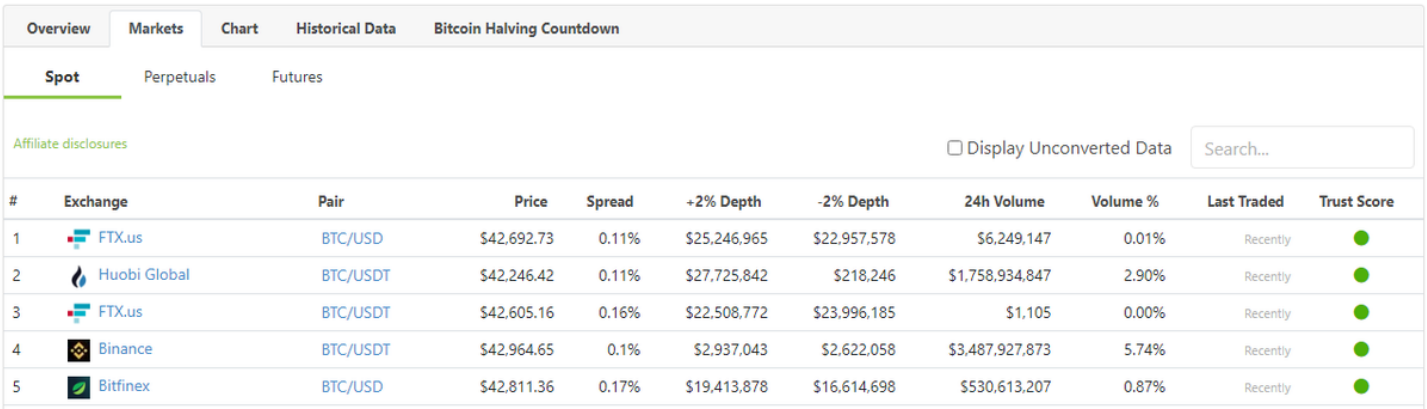

7/ A little further down, list of exchanges. Some stats -

Spread:
% difference between buy/sell

+-2% Depth:
$$ it takes to move price by +-2%.

Trust Score:
To estimate if a trading pair has good liquidity.

Links go directly to trading pages for convenience too.

8/ Spread & depth matters - on an illiquid market you will not be able to buy/sell at advertised prices because your order moves the prices by a lot.

Liquidity matters. Read more here:

Got your first crypto? Time to start tracking it -

9/ Track it all w/ our Portfolio - https://t.co/YVJM7lCX1D

Have multiple portfolio for diff types of holdings - long term, short term, etc

Add in transactions and we'll calculate P&L for you!

p.s. we're looking at automating certain things, like integrating with exchange API!
