1/21 Don't fear it, secure it.

A thread on creating a secure #Bitcoin backup with the Hodlr Disks from @hodlrswiss.

If you value permissionless money & the ability to transact without being censored then self-custody & get your bitcoin out of third party control.

2/21 This thread is the short version of a more detailed article which can be found on my blog:

https://t.co/b7rlZ7Vass

3/21 Covered here is unboxing, setting up, & torching the Hodlr Disks made by @hodlrswiss. In Nov. Hodlr Swiss reached out to see if I would be interested trying their new stainless steel backup. It looked really cool so I said "hell yeah!"
