During last Sunday Mass it was said red is a color of bloodshed. True, but women experience red each month. It is a knowledge that new life is possible. It is also a color of birth for new life arriving. We are all united by blood regardless of race, creed or color.

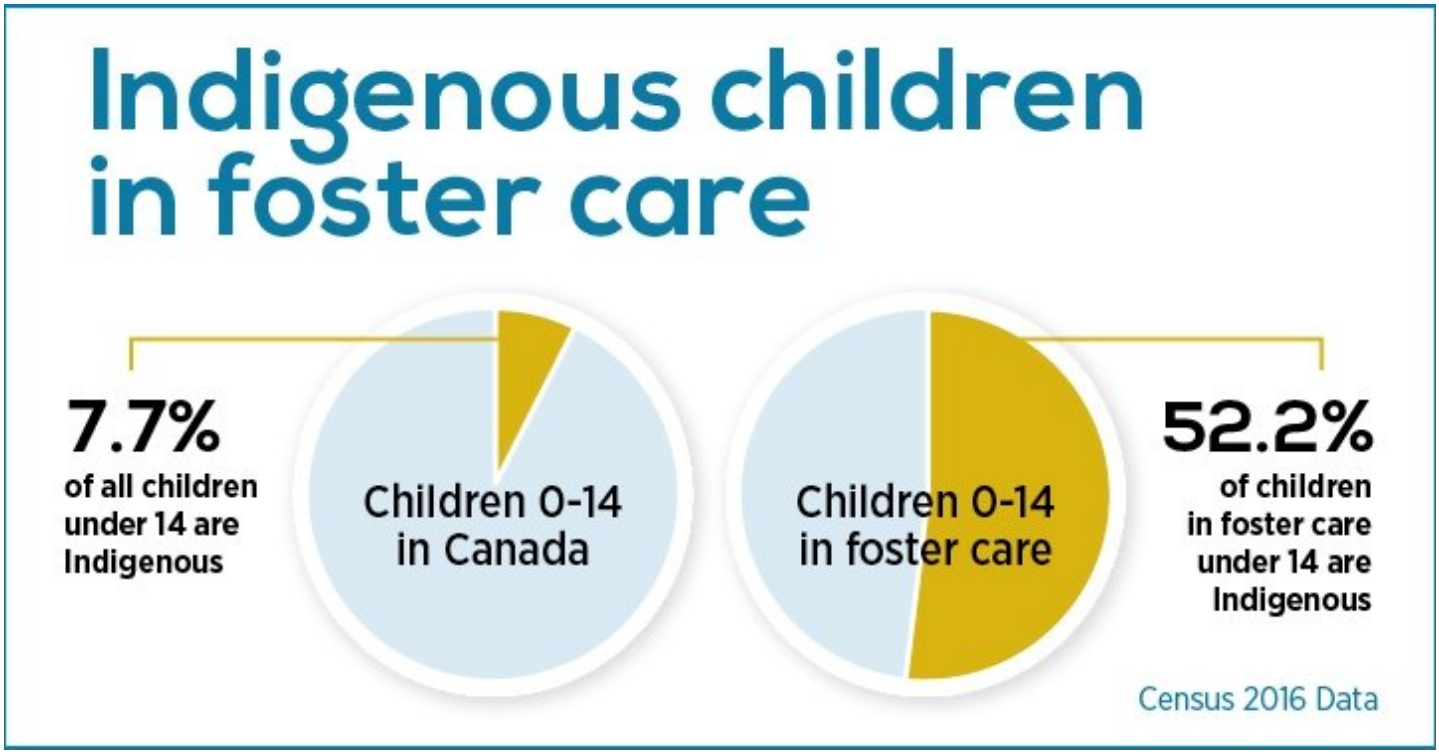

It is absolutely possible to bleed without hurting anyone. It is absolutely possible to bleed without self injury. Ask any woman. God gave us that power. It's time for peaceful bloodshed in the Vatican. Bring the women priests into the community. Include us in faith.

The exclusion of equity and the disregard of women has resulted in this in Canada. The richest 44 people have made 53 Billion during Covid. We cannot afford to keep this going. They have no inheritance tax. https://t.co/y5RgPXYq42

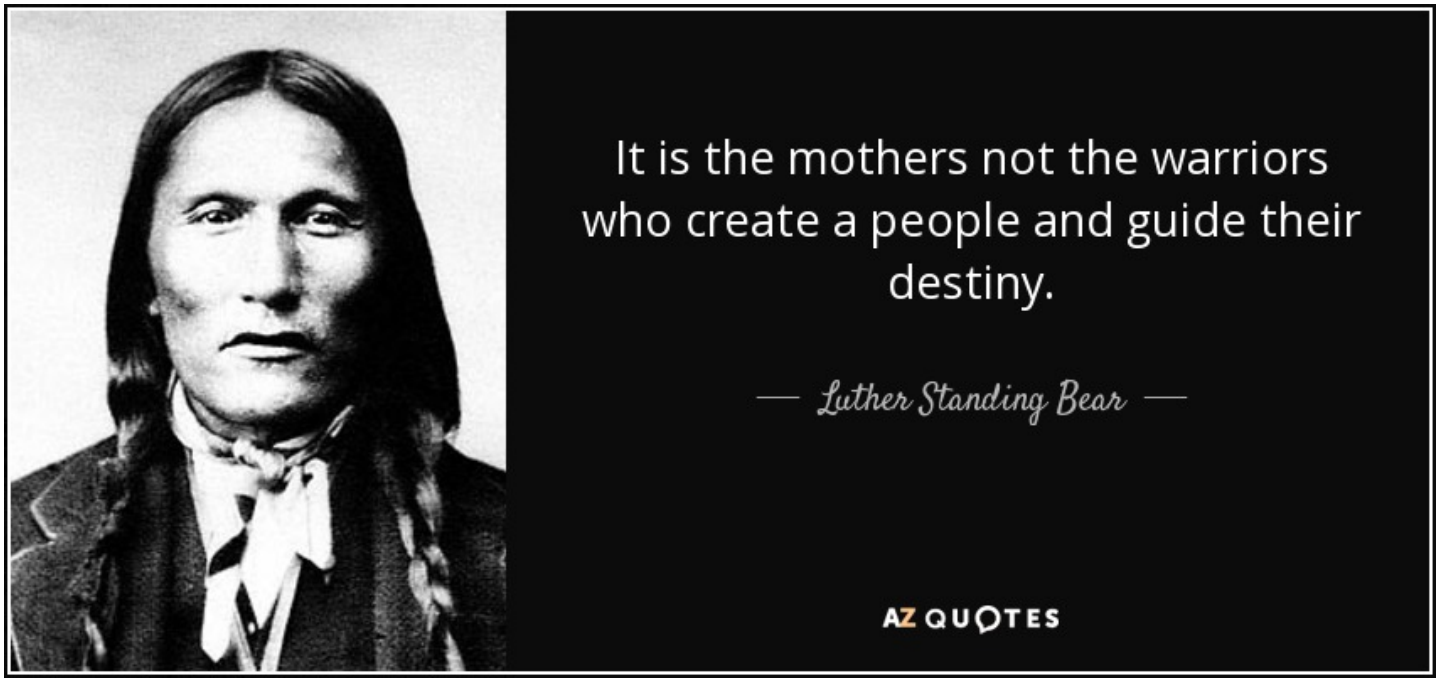

Canada was founded upon the clear disregard of women. Canada is actively human trafficking people by making us wards of the state with welfare, prisons, residential schools and poverty. They turned our own blood into a tool to strip us of our rights by blood quantum laws.

We need to recognize God in women. It was my grandmothers who administered the sacraments of last rights & baptism as midwife/healer when Priests were unavailable. If a baby is dying, it had to be done and it was with love. It brought peace. My grandma did that. Why deny love.

Acadians retained our Roman Catholic with the strength of the women. For all the abuse we suffered, the men would have killed someone and we would have all ended up dead. Our mothers & grandmothers demanded better from us. They shaped us all. The Church needs that strength today.

Now is the church's time to choose to embrace the totality of God in the sanctity of all humans or to fade into the history books as being nothing more than a tool of sexism that serves the oligarchy. My view, if you want to save the church include those of peaceful bloodshed.

Periods are not unclean, periods are not evil, periods are simply a step in the process of human reproduction. Besides human women, other animals experience menstruation as well. They include old world monkeys, spiny mouse, elephant shrew and various bats.
