MY TAKEAWAYS FROM ATOMIC HABITS by @JamesClear

<u>A</u> spectacular book that focuses on building HABITS following SYSTEMS to achieve RESULTS - Instead of the traditional GOAL BASED approach.

It's a highly engaging read with plenty of practical examples .

#BookRecommendation

2/20

Your OUTCOMES are a lagging measure of your HABITS . Although difficult to appreciate on a daily basis , they MATTER IMMENSELY.

Change your habit ,to change the outcome.

It doesn't matter WHERE you are currently,

CHANGE YOUR HABIT TO CHANGE THE TRAJECTORY OF YOUR LIFE!■

THE CONCEPT OF AGGREGATION OF MARGINAL GAINS. TINY MARGIN OF IMPROVEMENT IN EVERYTHING * RESEARCH - ITERATE ZERO IN ON THE REQUIREMENT - THE Then emission it & break it down in smaller poutions IMPROVE BY (1 1.) CACH DAY REFER (MAGE) SIGNIFICANT UMULATIVELY IMPROVE Massive success doesn't require Massive X ctions It requires small improvements CONSISTENTLY I'/ BETTER EVERY DAY 365 0.99 = 0.03 1% WORSE EVERY DAY FOR LYR RESULTS 365 IMPROVEMENT 17 BETTER 1-01 = 37-78 EVERY DAY FOR IYR DECLINE TIME Leading Edge

You do not RISE to the level of your GOALS . You FALL to the level of your SYSTEMS .

Why so?

Both WINNERS & LOSERS have a Goal . What then sets them apart?

It's having a SYSTEM in place.

Systems are forever & they result in continuous SELF IMPROVEMENT .

GOALS : OVER RATED SySTEMS: UNDER RATED ours on Systems, -> Goals are the sesults you want to a chieve > Systems are the purcesses that lead to those results and hence lend continuous self improvement ONLY THINKING ABOUT YOUR GOAL WITHOUT MY System - X (causes unhappiness) Unique to each one. Find what works BEST or you) STICK TO IT. ATOMIC HABITS ARE LITTLE HABITS that are part of larger system & OUTCOME ORIENTED SMALL CHANGES SEEM INCONSPICUOUS UNTIL THE CRITICAL THRESHOLD IS CROSSED - BE PATIENT g: I ensure I short off my mobile when feading. Purved difficult initially + READING IN SOLITUDE fearlts: 1 Improved Concentration @ Thinking in isolation brings clarity 3 Many thongs are known, but never a dono wledged. 1 HIGH PROJUCTIVITY Leading

Reaching a goal may give rise to emptiness or targetting another goal. But that isn't the case for systems.

Hence GOALS - OVER RATED SYSTEMS - UNDER RATED

2 small examples on my system based approach for self improvement.

#booklovers

CHANGING THE INHERENT YOU IS ESSENTIAL FOR A SYSTEM TO WORK & BE CONTINUED Don't just make it an Interme Based Habit | TRUE BEHAVIOUR CHANGE IS IDENTITY CHANGE It is hard to change our HABITS without changing THE UNDERLYING BELIEF that lead to = OWE PAST BEHAVIOUR 9 : " D was "hourible" at reading MAPS. 1) MOSTLY BECAUSE I DIDNTWANT TO WIDERSTAND DSECONDLY BECAUSE I DID NOT THINK I COULD UNDERSTAND System: 1 first changed mindset 2) Actually wanted to leaven Began with small TRIALS & ENVISIONING IT Transition Hent wungly, GOT LOST I'V Understood OVER GYEARS 6) Repeated (3) (7) Guadrally learnt to change appersas Becoming quiet good at it/ Change was VISIBLE only after a LONG TIME Leading Edge

Your identity emerges out of your habits. Every action is a vote for the type of person you wish to become.

Despite knowing better we find that changing our habits is challenging because :

- 1) We try to change the wrong thing
- 2) We try to change our habits in the wrong way.

6/20

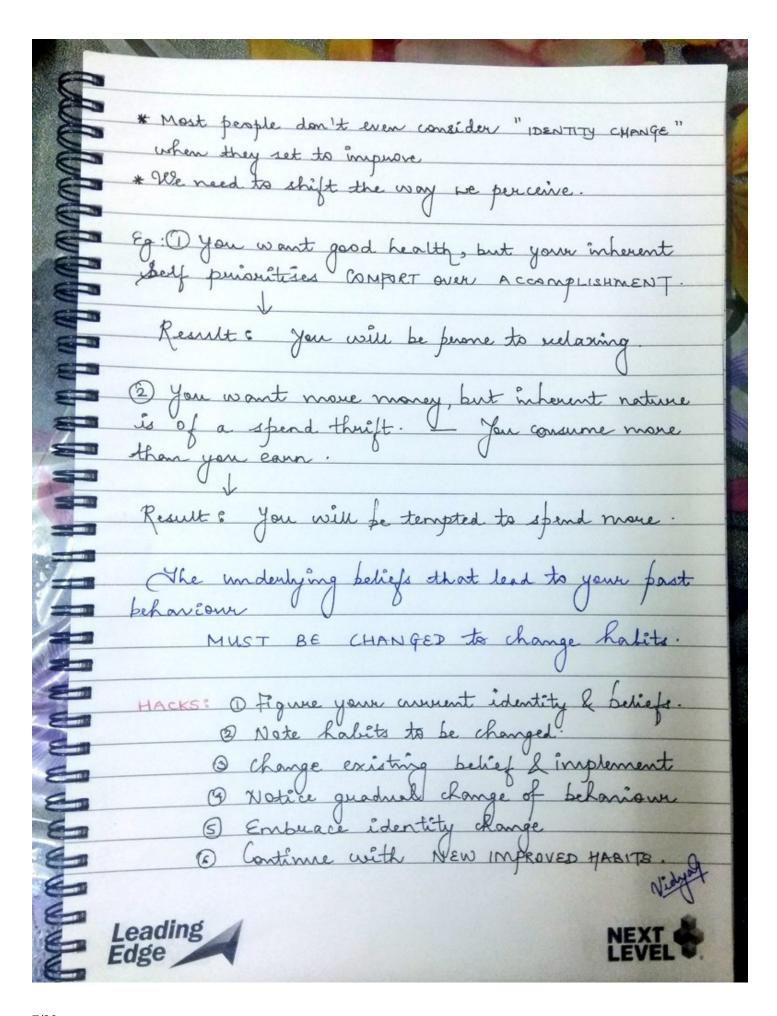

The 3 layers of behaviour change

- 1. Outcome change: WHAT we want to change
- 2. Process change: HOW we want to change
- 3. Identity change: WHY change.

(Most important)

A Behaviour that is incongruent with the self will not last.

Why?

- * The science of HOW habits work
- * The HABIT LOOP
- * The 4 laws of BEHAVIOUR CHANGE.(Different methods to help BUILD Good habits & BREAK Bad ones.)

With the help of many examples to understand how to go about things, the possible problems etc.

8/20

Fun fact ! ■■

We don't need to be aware of the CUE for a habit to begin. No conscious attention is needed.

This is what makes habits USEFUL.

But then THIS IS ALSO what makes them DANGEROUS!

As the MORE we repeat these patterns, the LESS likely we are to question them!

9/20

I liked the concept of #HabitScorecard which helps in becoming more aware of your behaviour.

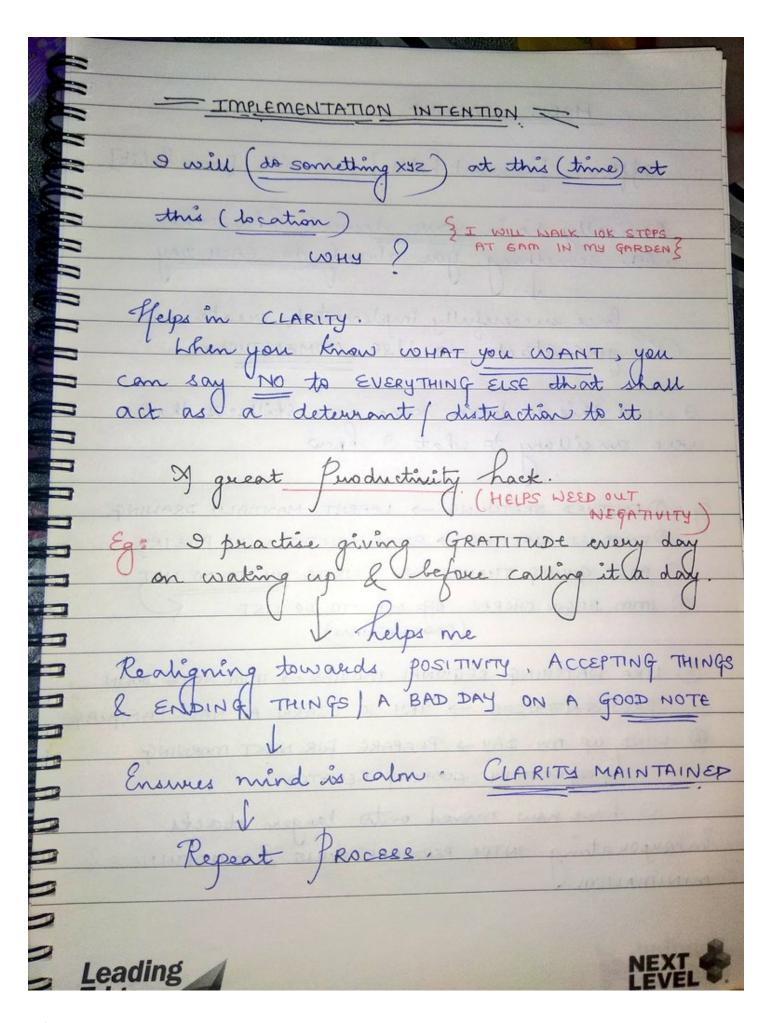

- * Enlist habits
- * Rate them
- * Create a Habits Scorecard
- * Observe events as is
- * No criticism . No appreciation
- * Acknowledge
- * Work towards betterment
- * Review

10/20

#ImplementationIntention helps in planning out beforehand WHEN & WHERE TO ACT & thereafter STICKING to them .

SPECIFICS matter as most of us lack NOT Intention, BUT CLARITY.

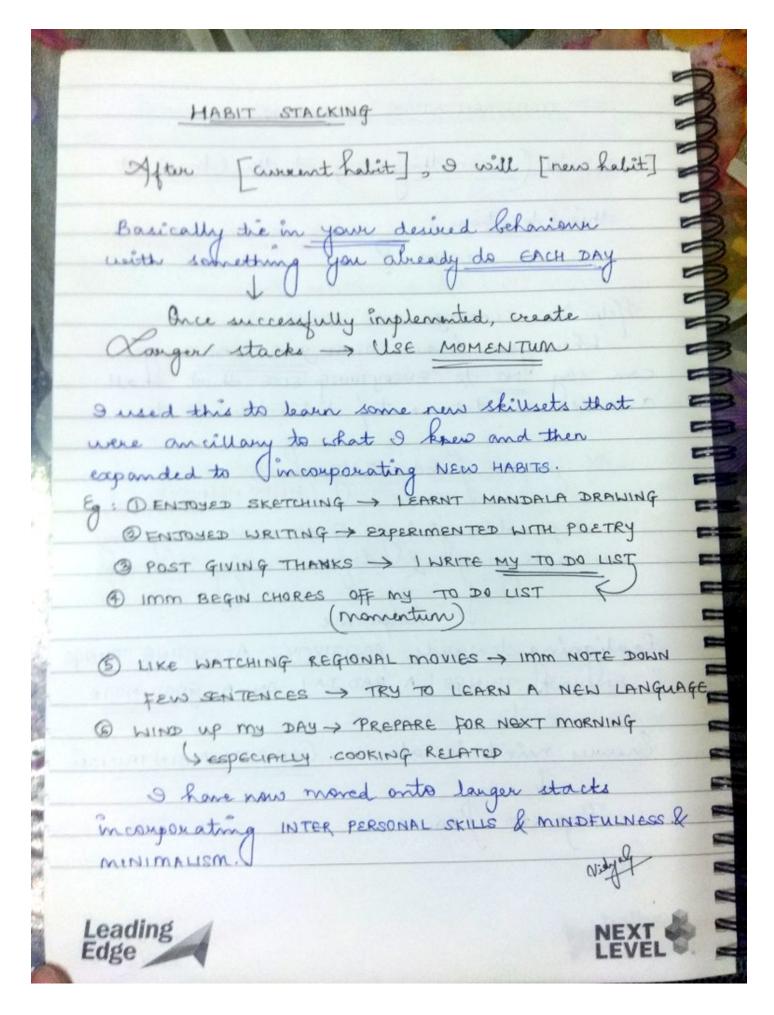

- *Helps in saying NO.
- *Ensures FOCUS.
- *Helps in TIME MANAGEMENT.

Used to do this unknowingly but it's more fun incorporating it KNOWING HOW to go about it !!

Eg:

- *Find something good Appreciate it.
- *Read something good Make Notes of it.

- * Make the CUES of GOOD HABITS obvious & BAD HABITS invisible.
- * Easier to AVOID temptation than RESIST it. (ESPECIALLY FOR MARKETS)
- * Habits once formed are unlikely to be FORGOTTEN.
- * Use of Temptation bundling.

HOW TO CREATE A GOOD HABIT	
The 1st Law	Make It Obvious
1.1	Fill out the Habits Scorecard. Write down your currently habits to become aware of them.
1.2	Use implementation intentions: "I will [BEHAVIOR] [TIME] in [LOCATION]."
1.3	Use habit stacking: "After [CURRENT HABIT], I will [NEW HABIT]."
1.4	Design your environment. Make the cues of good lobvious and visible.
The 2nd Law	Make It Attractive
The 3rd Law	Make It Easy
The 4th Law	Make It Satisfying

Essentially we imitate the habits of 3 groups

- * The Close
- * The Many

* The Powerful Each group offers an opportunity to leverage the 2nd law of Behaviour change & make our habits more attractive. A very under rated concept I believe! 14/20 Another interesting aspect is HOW TO ACHIEVE MORE WITH LESS EFFORT. Seems difficult right? ■ Here's where practising environment design comes into play. Habits are easier to build when they fit into the flow of your life . Reduce #friction. Try it out !! 15/20 The TWO MINUTE RULE blew my mind away . Such a simple but profound concept! *Basically START SMALL. *Keep it EASY. *STICK to it. *ITERATE. A NEW HABIT SHOULD TAKE LESS THAN TWO MINUTES TO DO. Gradually SCALE UP towards your GOAL. Worked brilliantly for me! 16/20 Few other methods discussed to develop habits include : *Habit Shaping, *Automating a Habit *Habit Tracking *Goldilocks Rule etc. We might have already practiced a few of them without knowing the technical basis behind it.

17/20

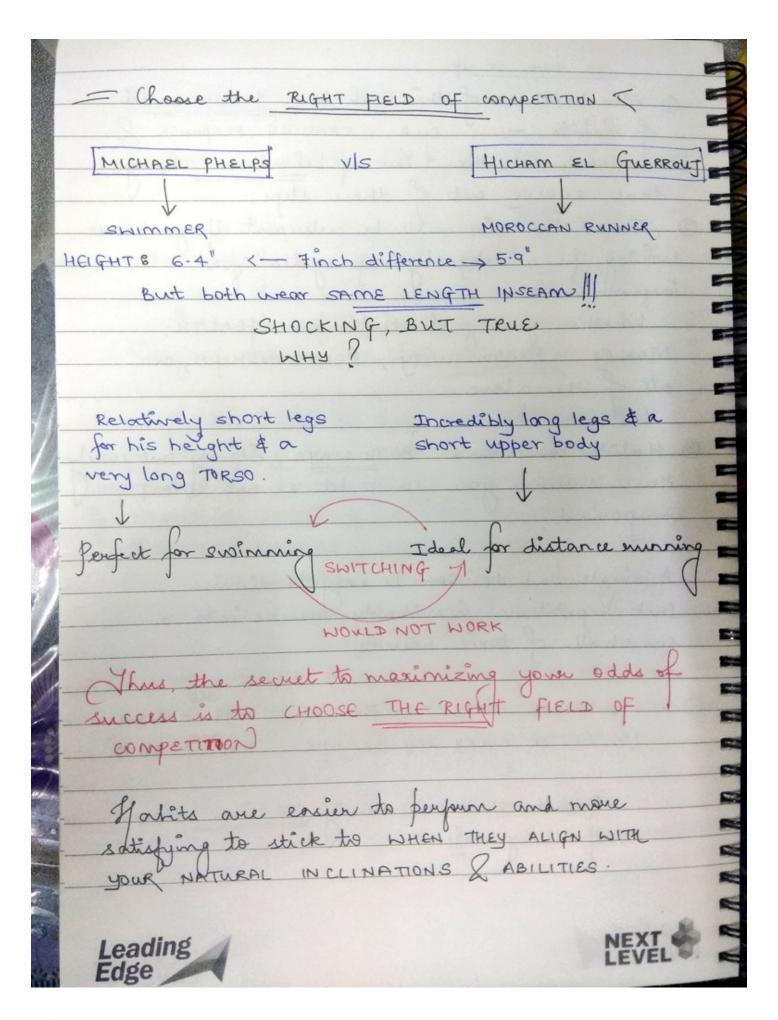

The secret to maximising your odds of success is to choose the RIGHT FIELD OF COMPETITION.

We all are born with different abilities .

#MethodsToDevelopHabits

Our environment determines the SUITABILITY of our genes & the UTILITY of our natural talents.

COMPETENCE is dependent on CONTEXT.

Sticking to your habits and following the underlying processes & fighting monotony when there is no motivation is tough.

Doing it repeatedly shall SET YOU APART from the amateurs & make you a professional.

FALL IN LOVE WITH BOREDOM!

19/20

1% WORSE EVERY DAY FOR 1 YR vs 1% BETTER EVERY DAY FOR 1 YR

When you look back over a decade the VALUE of GOOD HABITS & the COST of BAD ONES becomes strikingly apparent !! This is WHY understanding DETAILS is essential.

Keep up the habits & REFINE them as required.

Some pointers Xet your Values puinciples & BELIEFS Edentity guide WERADE EMPAND IDENTITY ironment matters a lot Especially to BREAK BAD HABITS. Peers V influence tonic HABITS ARE ALL ABOUT BECOMINF. U Decide the Type of person you Ultimately, you lecome your HABITS -Leading Edge

An Atomic habit is a little habit that is part of a larger system.

Just as atoms are the building blocks of molecules, #AtomicHabits are the building blocks of remarkable success!

A SHEER MASTERPIECE!

Thanks for this @JamesClear !
