"This fearless book [by @abigailshrier] shows how girls' bodies have become collateral damage in adult culture wars," says @VictoriaPeckham. In 2021 we must explore what drives gender identity theorists to put their ideology above the health & welfare

of children & young people. Gender identity ideologues promote a "progressive" new world where "trans children" skip an essential stage of every human being's physical, psychological & sexual development - puberty. /2

Then these "trans children" move on from puberty blockers to cross sex hormones whose effects are immediate and visible. 98% do @TaviAndPort. More experimentation and no measurable improvement to mental health. /3 https://t.co/gS1rB0E7Ef

And then we see some surgeons who have forgotten their oath to "First, do no harm" or who simply cannot resist the temptation of £/$. They remove healthy organs whose functionality can never be restored. /4

Most children play, dress up, put on make-up & cowboy hats. They use their imagination to try out all sorts of things. We think they're just growing up normally. We believe they deserve protection from a global movement that seeks to force outdated gender stereotypes on all /5

This gender identity movement seeks to erase facts & remove both science & research from discussions on sex and gender. And the most invidious camouflage this movement uses are the words "progressive & kind". /6

To those who say – oh but this is a welcome release for all those "trans children" who were previously denied their right to be "who they are," we have two questions: /7

Please explain 1)why there are three times as many girls rushing to treatment, as boys? 2)why it is that research from Jul 2020 tells us "Same-sex attraction was particularly common among natal females, with only 8.5% of those referred to the GIDS describing themselves /8

as primarily attracted to boys. This raises important questions about current societal acceptance of young lesbians even within youth LGBTQ+ culture. It is possible that at least some gender-non-conforming girls come to believe themselves boys or 'trans masculine non-binary' /9

as more acceptable or comfortable explanations for same-sex sexual attraction,a kind of ‘internalised homophobia’. /10

https://t.co/qKmmAQG7gF

So let's focus on fact in 2021. Let's challenge every lie coming from those gender identity lobby groups who promote their cruel, deluded ideology at the expense of children. Let's follow the brave example of @KLBfax and others to expose what has been the scandalous behaviour /11

of those who remained at @TaviAndPort. Let's work together to strive for the best possible longterm health and happiness for all children & young people.#SexNotGender #FactsMatter #StopExperimentsOnChildrenIn2021 /12
