#DeepakNitrite is not changing it's pattern

It goes in consolidation for 2 months after every result. Then in next one month, it crosses previous high and even more.

That's how the journey of 8x has completed.. waiting to hit 2400 to get my first ever 10x ■■

> Most of the time #DeepakNitrite falls after good results.. even in Q2, I asked to take it as an opportunity when it was between 550-600.
>
> Even now max downside is 100-150 points but one thing I'm sure, it'll cross 2100++ in next 2 months.
