[Aditya Todmal](#)

[@AdityaTodmal](#)

Thread on how [@ITRADE191](#) made 3 lakhs in 2 days.

I'm posting his chart logics here which he has shared with me realtime.

You will need:

1. Pivots
2. Vwap
3. PDL/PDH (Previous day high/low)
4. Advance/Decline Ratio.

(1/7)

This is the Pivot Setting used by [@ITRADE191](#)

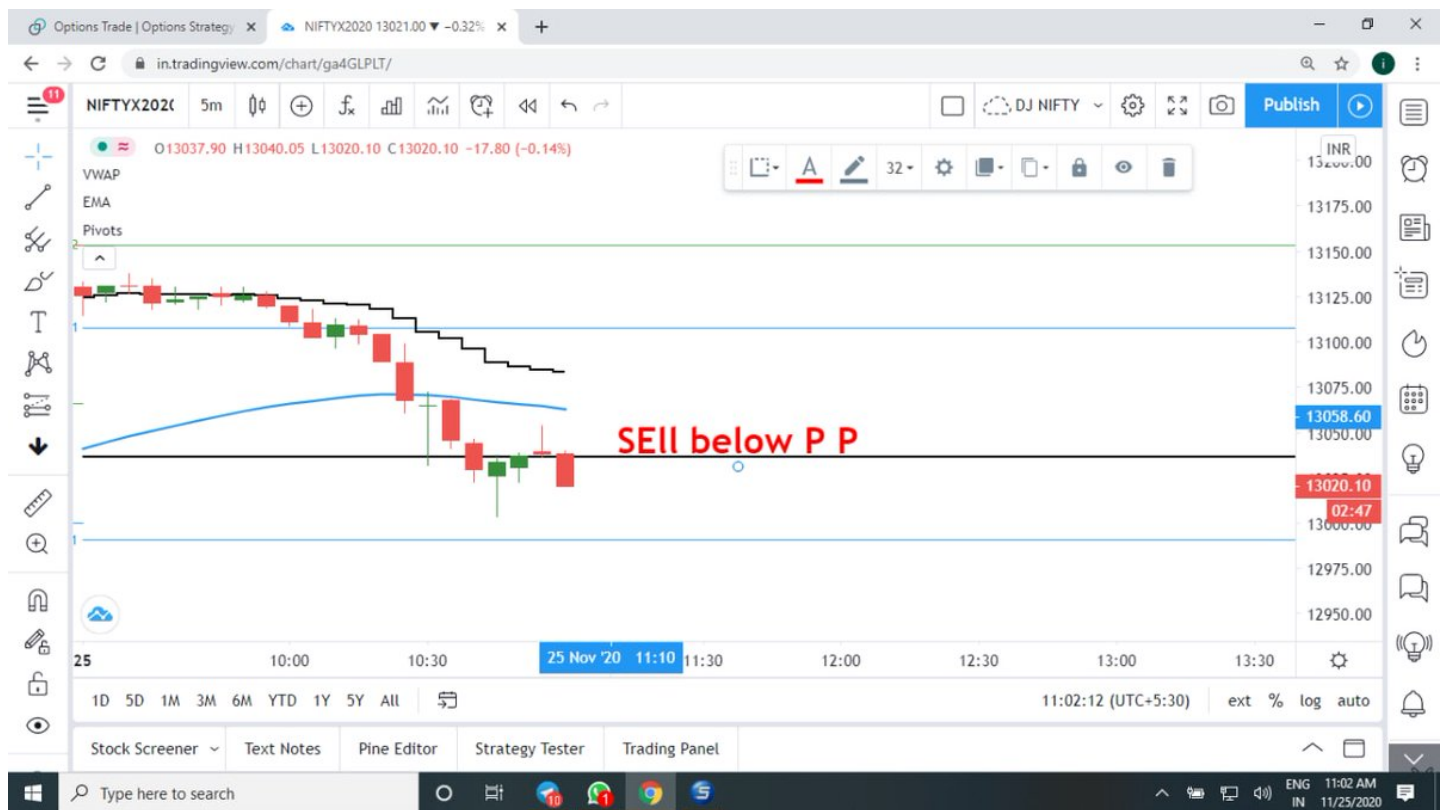

(2/7)

At 11 he told me to short Nifty as it was breaking a pivot.

Gave immediate 60 points profit.

(3/7)

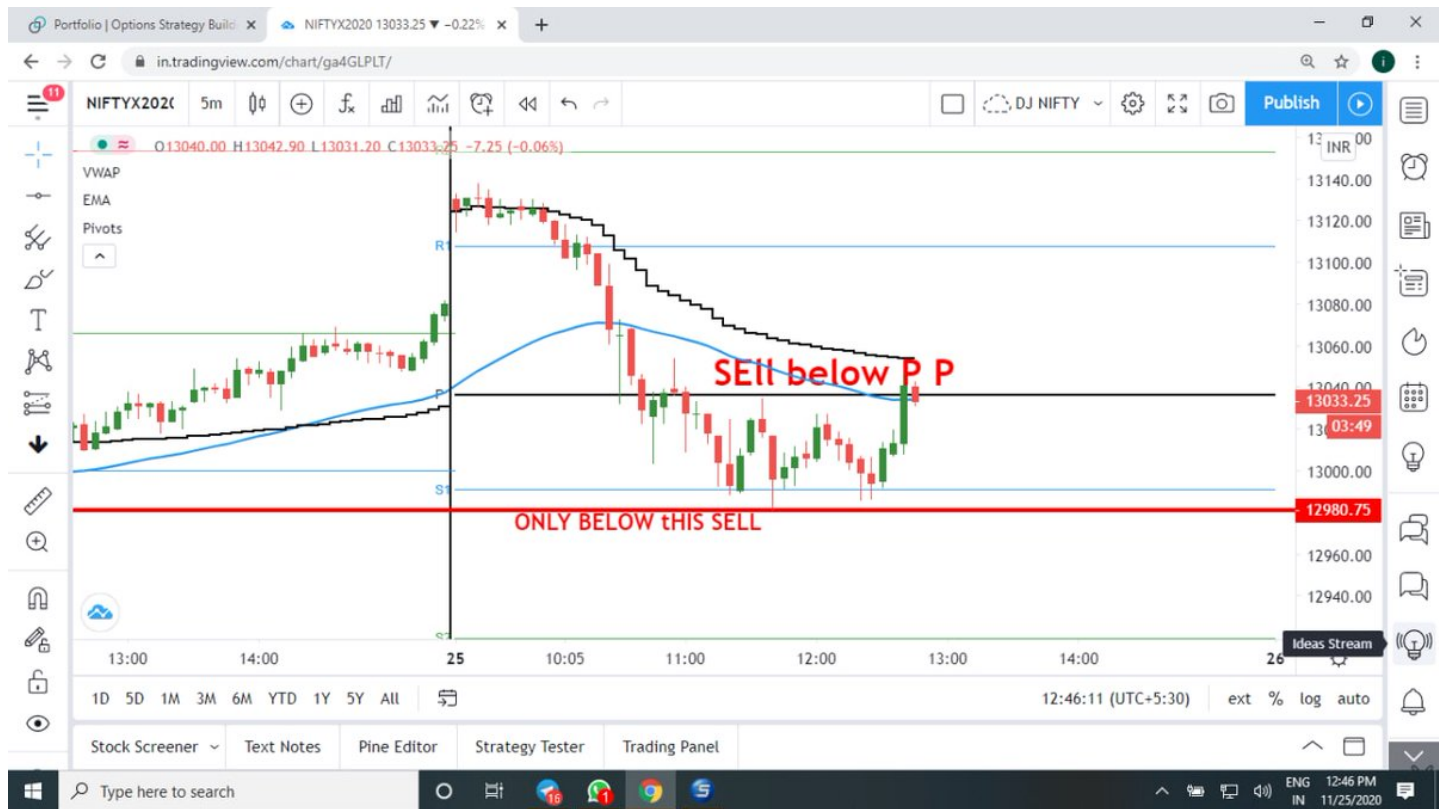

The red line marked here was PDL, he trades using these decision points daily. He shorted Nifty futures again the moment it broke that level.

Again made money while pyramiding into his trade.

His sl was PDH, Tuesday 24th Nov high. Would've reversed his position there.

(4/7)

Got his conviction from Advance/Declines in Nifty. All the bigger stocks were trading in red so he rode the downfall.

Here is his mtm of yesterday.

Made around 1.2 lakh here.

(5/7)

Itna conviction kaise?

Itna conviction kaise?

The screenshot shows the NSE India website with the Nifty50 index at 12,885.10. Below the index, there is a table of index movers. The table is organized into columns, each representing a different sector or company. The columns are: ONGC, SBIN, SBILIFE, GAIL, POWERGRID, and HDFCLIFE. Each column lists the company name, its current price, and its percentage change from the previous day. The table is color-coded: green for positive changes and red for negative changes.

Aditya Trivedi

Screenshot leke added it to my learnings

2:21 PM

Today on 26th expiry day, he had marked levels which were supports and resistances and decided how he would act at these levels with a plan.

(6/7)

A positive advance/decline and a break of the resistance of 12900 levels gave him the conviction to buy Nifty futures aggressively.

He made around 1.7 lakh profit today as shown in the mtm which is attached, highest profit in NIFTY future.

(7/7)
