Lal Pathlabs - Updated chart. After completing the target of CnH at 3960, the stock consolidated further in a rectangle and broke out further for a target of 4340. A strong stock will keep on consolidating in middle during an upward journey.

Lal Path Labs - IH&S can also be a continuation pattern. The stock is in a constant uptrend. You should always be biased for a 'buy' in these counters.

Two consecutive Double top buys in PnF 1%*3 Box size and reversal.
