The great replacement isn't a conspiracy theory, it is the inevitable outcome of non-stop immigration of populations whom do not wish to assimilate and have way higher birth rates than the native population... It's purely a mathematical reality.

These arguments are laid out by Ignatiev and other like-minded scholars in the journal Race Traitor, established in 1993 "to run the film backwards, to explore how people who had been brought up as white might become unwhite".

With a masthead that declared "Treason to whiteness is loyalty to humanity", and whose first words in its first issue urged readers to "Abolish the white race – by any means necessary", it was obvious what the political and scholarly aim of Race Traitor would be.
