For those who haven't heard, we are witnessing a globally coordinated plan (conspiracy) to use fear and safety as cover for a #GreatReset of the world economy & society. This is a planned and internationally coordinated strategy by the most powerful global elites-the ruling class

The aim of the global ruling class is to refashion global capitalism into what we can call neo-feudalist technocratic bio-fascism-or 'global fascism' for short.

The aim is for remaining liberal democratic rights and freedoms that have been in place at least formally in the 'west' for the last few hundred years to be eroded and withdrawn.

There's lots of different terminology and branding, for example: Great Reset, Fourth Industrial Revolution, Technocracy. The main aim of this plan is the concentration of power over capital, wealth, people and nature in the hands of a the very largest corporations and monopolies.

This plan for a new phase of global capitalism is enabled by national states and governments, international organisations & quangos (EU, UN, NATO, IMF, WTO, WHO, Gates, GAVI). With no clear lines between state and non-state actors, this is also a form of global corporatism.

China's authoritarian capitalism is the model- but on a global scale and with ever more developed use of control technology (including medical), surveillance and AI. Ultimately, trans- and post-humanism are the goals. Here the Great Reset is anti-human, eugenicist and Malthusian.

Environmentalist and egalitarian-sounding narratives and slogans such as sustainability, identity, fairness and equity are used to both obscure the class nature of the plan and to appeal to and co-opt 'left' and 'progressive' people and movements.

We can only understand #lockdown in this context, for example it is an ideal opportunity for big capitalists and their state facilitators to crush SMEs and expand monopolies and for western states to permanently curtail 'legacy freedoms' that are hurdles to their dominance.

This is not in any way a “conspiracy theory” and anyone who rejects it as such is just not paying attention. It is being done in plain sight, in front of our eyes, openly. Safety is being used as the catch-all justification.

The lives of people have changed unimaginably and for the worse in just 9 months. Children have become the main targets.
