Twitter Thread by Nirbhay Vashisht

50 Common Mistakes most developers make while starting out

A thread■■

- ■■1. Focusing on completing courses instead of coding (or completing projects) .
- ■■2. Skipping the fundamentals.
- ■■3. Not joining a developer community.
- ■■4. Not creating projects from scratch.
- ■■5. Skipping Data Structures.
- ■■6. Not reading the documentation.
- ■■7. Trying to learn everything in one day.
- ■■8. Blindly following the tutorial and not extending the code or making their own version of code.
- ■■9. Not asking for help when needed.
- ■■10. Never commenting the code (In required places).
- ■■11. Endlessly Planning instead of Building.
- ■■12. Learning different technologies instead of mastering one.
- ■■13. Not reading stuff (books/articles/documentation).
- ■■14. Not maintaining a balance between programming and not programming.
- ■■15. Not finishing what they started

■■16. Not building stuff they care about.
■■17. Getting overwhelmed by others' progress/headstart
■■18. Not knowing when to quite and start over.
■■19. Not practising enough.
■■20. Endlessly buying Udemy courses.
■■21. Not trying new stuff (frameworks etc).
■■22. Not sleeping enough.
■■23. Getting addicted to caffeine.
■■24. Being afraid to experimentation.
■■25. Letting Impostor syndrome take over.
■■26. Overworking.
■■27. Sacrificing Social life.
■■28. Rushing through a problem/course/book/project
■■29. Not being curious.
■■30. Sacrificing Mental Health.
■■31. Not having fun.
■■32. Getting stuck on one technology because of stubbornness.
■■33. Lacking self motivation.
■■34. Not talking to other developers.
■■35. Quiting after failing.
■■36. Not building personal projects.
■■37. Not showing your projects to others.
■■38. Not asking others for feedback.
■■39. Trying to learn everything at once.

■■40. Blindly following others advise without researching on your own.
■■41. Not having a strategy.
■■42. Waiting until everything is perfect.
■■43. Not learning from one's mistakes.
■■44. Feeling dumb.
■■45. Comparing yourself to others.
■■46. Not reading theory.
■■47. Not maintaining a balance in life.
■■48. Being a perfectionist.(Conditions apply)
■■49. Not accepting uncertainty.
■■50. Not finding mentors/dev friends
Don't make these mistakes. Happy Coding ♥■■■■■■■■■■■■■■■■■■■■■■■■■■■■■■■■■■■■
I am soo sorry everyone■
Btw follow me for more programming experience/content■■
