And when the dust settles the research system will have to be reformed to severely disincentivize assholes and reward the good players. Who should never be desperate to get funded anymore. ■

World needs virology.

Who's your real friend, #WashingtonDC and who's pulling the wool over your eyes? So observe the traits real close, you're gonna need this lest you end up in this situation again. And proceed accordingly.

This month USAID launched DEEP VZN, Global Virome twin. It'll find thousands of novel deadly viruses and bring them home. Maybe even to that DTRA lab near you, #WashingtonDC. As you know now, certain people will be busy adapting those finds to humans.
