Day in the Life of a Hedge Fund Analyst

Few live to tell the tale.

"Was it like Billions?"

"Describe ur investment process?"

"What did u learn?"

**I get these questions all the time, but for a while I was afraid of answering publicly.
No more!**

Hedge fund story time.

■

■/

1/ ■ 6AM Pre-Market Review

Wake up thinking about ur overnight positions.

What happened during London/Asia trading?

Scan the major news on ur way to office.

■■■■■■■

Think about how ur getting screwed by beta (general macro, FOMC, inflation, etc.) cuz ur net long (or net short).

2/ 7AM Portfolio Review

U'll typically have ~250 names in the portfolio "universe" (stocks w/ active positions & those on watchlist but already modeled).

Review each thesis vis-a-vis new market conditions. Anything changed?

Should u downside/upsized any?

New trade opportunities?

Here's a checklist of top items to check per company:

- Any earnings calls this week?
- Any product releases?
- Any new sell-side reports? Downgrades/Upgrades?
- Any M&A rumors in the space?
- Any management change announcements?
- Any guidance revisions?
- Any legal happenings?

3/ 8AM Plan out your daily/weekly agenda

Major types of events that'll populate ur calendar:

- Investor day at XYZ
- Q1-Q4 earnings call
- XYZ road show
- Dinner event w/ IR (investor relations) at XYZ
- Private buy-side bus trip (w/ mgmt @ XYZ) arranged by GS
- JPM conference

4/ 9AM Team meeting just before markets open

Discuss w/ ur PM:

- whether overnight news impacts/changes ur thesis on each open position
- prep work & questions u compiled for XYZ upcoming event later in the day
- pre-mortem on some new positions ur considering adding to the book

5/ 10AM Listen to XYZ earnings call

Every day a subset of the ~250 companies in ur universe will have earnings calls.

When start:

pre-market, during, or post-market

Structure:

- first CEO gives his spiel
- then CFO gives his spiel
- then sell-side analysts ask dumb questions

<div> <div> </div> <div> <h1>EARNINGS WHISPERS</h1> </div> </div> <div> <h2>The Most Anticipated Earnings Releases</h2> <p>for the month beginning April 18, 2022 <small>(only showing confirmed release dates)</small></p> </div>									
Monday		Tuesday		Wednesday		Thursday		Friday

6/ 11AM - 3PM: Read/make/revise financial models

This is the crux of ur job.

So lemme describe what exactly this entails.

A "financial model" is just 3 accounting statements stacked on top of each other in Excel:

- income stmt (IS)
- cash flow stmt (CFS)
- balance sheet (BS)

Why & how to "link" the 3 statements:

The reason why analysts stack all 3 on top of each other is cuz all interwoven:

- net profit:
flows from bottom of IS to retained earnings in BS & first line of CFS
- working capital:
from CFS, is the diff btw current assets & liabilities

Income Statement

Revenue	102,007	118,086	131,345	142,341	150,772	158,311	165,435	172,052
Cost of Goods Sold (COGS)	39,023	48,004	49,123	53,254	57,310	58,575	61,211	61,939

Cash from Investing	15,000	15,000	15,000		15,000	15,000	10,000	25,000

Where do you get financial models from?

Typically, u buy from sell-side & modify as necessary.

Historical statements are found in all 10K/Qs. Easy to verify.

But what u really want to modify are the projections of FUTURE metrics.

After all this is the fundamental analyst alpha.

7/4pm Coffee & gossip

Markets just closed. Your PM is doing some intense clean-up/post-mortem or squeezing in post-market adjustments.

You get coffee, run into other analyst, & complain/brag about headcount at other teams, who's allocations getting slashed, who's doubled, etc.

8/ 4:30pm Post-Mortem

Markets just closed, so u got some reflecting to do:

Any major gains?

Any major losses?

Why did the moves happen?

Did u anticipate them?

How can u better anticipate & respond going forward?

See ■ below on how to do a post-mortem:

<https://t.co/G3jzYCb6Qf>

\U0001fa9eHow Hedge Funds Do Post-Mortems\U0001fa9e

"Pain+Reflection=Progress" ~Ray Dalio

The post-mortem is the hedge fund PM's leg day: can't skip.

Done right, it's a systematic exercise that mega boosts performance. Yet ppl never explain how to do one.

So [@SeifelCapital](#)(CS) & I teamed up

9/ 7pm-9pm

[--- Insert Boring Mandatory Dinner Event ---]

U tell ur boss ur there for info gathering.

U tell urself ur there to hobnob in case book blows up tomorrow 'n u gotta jump ship to Millennium.

Ur really there to stuff ur face w/ schnapps & salmon heuer d'oeuvres.

10/ 9:30pm Asian markets open

I will not check markets.

I will not check markets.

I will n---

HOLY SHIT! BABA DOWN 9% ALREADY?!?!

WTF tere's like no news.

Damn retail stocks!

U whip out ur laptop & start planning how u'll respond tomorrow. More post-mortems in the queue...■■■■■

11/ 12AM Existential Musings

Wonder if ur life would've turned out easier if u'd taken that Google software engineering internship instead of GS banking internship sophomore year in school.

JK.

Life is way more exciting now & u'll never regret it.
