visa is decluttering old drafts
@visakanv

motivating myself by reminding myself that I created my youtube account in 2005 so I can extend the graph all the way back and make it look really exciting

the less exciting but more useful graph

now I am going to make a plan for my next 200 youtube videos and then ignore them entirely. but first I have to reply to an email...

well that was quite a detour. now, to google sheets... https://t.co/0X5jgv5hyI

oh sure!

feels dismissive but it's the truth...

like the plan after making this spreadsheet is literally to ignore it and then do whatever

> Plans are worthless, planning is priceless. Spend a day making elaborate plans and then disregard them completely to make whatever you think is most compelling. Repeat monthly or quarterly
