■■■Remember as a kid, your parents used to talk in code around you so wouldn't know what they were really talking about? Do you remember when it was really hot because of the forest fires and DJT said that it was actually going to get really cold?

What if the is the climatic year of all Corona themes, only we didn't know about the most important one because they didn't want us to worry and had it handled?

Keywords, first image, top of page: geomagnetic polarity, bottom of page, things cooling.

Look at the current, the satellites and the towers.

Note the words "coronal" and "magnetic".

Remember all this mix up over Covfefe?

The writing is on the wall...

Looks like the sun and the pyramids are connected?

Looks like free energy to me! Note the Tesla coil.

The pyramids will be energy!

They know this...

Well, did you think she was just a pretty face? DJT's IQ is in the same ballpark.

We're in good hands...

The mystery's of the cube are known to few and sought by many... why am I showing you this video? Because new pyramids are now emerging off the coast of Alaska and anthropologists think it might be Atlantis.

Another kind of transformer... Another kind of cube... and yes, Saturn Returns Dec 17th — with its "family"? The cube must be important — look at all those movies produced featuring cube.

Note the 2811 and 28B11 decal on the cop car from the shooting spree in Nova Scotia's April's massacre.

The sun's solar storm....

The hidden power of pyramid energy… Looks like it will be used if the earth gets cooler. The sun's solar flares are linked to the solar flares...

Theres's your Corona and your plasma...

Solar flares are real.

Coming in the next two weeks?

Looks like there is a solution if things get colder, as well as a multi purpose satellite? Brilliant

Looks like we're prepared for this? We have upgraded our cell phone towers, have satellites ready for activation and ancient pyramids ready - flip the switch?

If any doubt, the Patriot in red has got our back to ensure the spiderverse web harmonizes with our universe...

Heading towards free energy?

Just keep working on your energy fields and chakras...;)
