I don't know who needs to hear this (wypipo), but this is classic casual racism practiced by White people who refuse to listen to the concerns of Black people.

Y'all haven't earned our trust, that's why we don't trust you.

What Dr. Fauci said may indeed be correct (they've lied and flip-flopped so much, stood by in silence to let liars, protecting their personal interests), but using the race of the Black doctor to try and convince AA the government and medicine is safe is SO casually racist. I...

The reason many Black people don't trust the vaccines or the government is because America has NEVER made right what its done wrong to us African Americans as a group collectively.

And when they do apologize it's decades, sometimes centuries AFTER the harm has been done.

In the meantime, White racists be out here conjuring up more shit, schemes and scams to harm us with instead of reparations.

It's the classic abuser gaslighting his/her victims.

Black folks ain't falling for that anymore, nor should they. Nor should anyone be asking them to.
