

Twitter Thread by Prof Ellen Townsend **#StopMassTesting**

Prof Ellen Townsend #StopMassTesting

@SelfHarmNotts

1/ A thread for all parents and caregivers about the dangers of mass testing and the continued neglect of young people in this crisis.

2/ Young people have been neglected and they are suffering see <https://t.co/btxlm8CSZG> for more information.

3/ The main reason for <https://t.co/btxlm8CSZG> (and an Open Letter I organised to Gavin Williamson in the summer to urge him to open schools) is to urge the government to take children into account when making decisions.

4/ Government are still not doing this – see recent articles from me <https://t.co/aQNO9I2KGE>
<https://t.co/h0U68Hv20x>

5/ So, we parents must protect our children. The single biggest thing we can do to stop this crisis is to refuse mass testing which is driving damaging restrictive policies: <https://t.co/NNGjKID1WL>

6/ Leading academics including [@deeksj](#) [@angelaraffle](#) [@AllysonPollock](#) urge the government to stop this unethical practice which is not a test for infectiousness. <https://t.co/CaieJ7nqK8>

7/ For more information on the serious pitfalls of testing see Dr Clare Craig's work who is a pathologist (the people that do the testing) <https://t.co/uSvXua1JDR>

8/ Recent findings from university mass testing showed no covid-19 to be found anywhere – the small number of positive tests detected were found to be false positives when double checked. (Saying the test was positive, when, in fact it was not.)

9/ The testing, which is inaccurate and misleading, is keeping society in damaging lockdowns and tiers which are not evidence-based and cause enormous damage to other health conditions (e.g. cancer), mental health and the economy.

10/ See <https://t.co/LqF1Ggs16C> and <https://t.co/fgo0G9JH9s> for damage of lockdowns data.

11/ At least excess deaths 21,000 in the UK were caused by lockdown the first English lockdown, not covid-19.
<https://t.co/lx38DqwsAP>

12/ Recent global data shows that keeping schools open, not closing them, reduces covid-19 transmission, yet schools are using tests to shut down entire year groups, even large parts of schools. <https://t.co/Q3R11HJmuE> <https://t.co/boYtNImeYc>

13/ Our children will bear the brunt of the economic fall out for years to come. All for a virus with a 99.97% recovery rate and average age of death of 82 years.

14/ You won't hear these statistics much in the main stream media because Ofcom have been censoring debate on covid-19 policies.

15/ I am aware of course that people have lost loved ones to covid-19 and this is, of course, very sad but to focus on one health issue at the expense of all others is folly and will have enormous repercussions for our children.

16/ A new website <https://t.co/Ah0ZT0SP6Q> is now bringing LEGAL JUSTICE to UK citizens for the devastating harm caused by lockdowns to families and businesses.

17/ This is long but the stakes for our children are very high. I am more than happy to discuss any of these issues. Please pass this message on to any parent/caregiver you feel needs to hear this. End.
