@TrueNPatriot

Very interesting.

Mood, snake, savage on one side, a diamond on the other, and what is that — apple sliced in half and pizza? Is Elon confirming the rumour about what NASA did on Mars? If Mars was on our planet - where would that be?

The red car is Mars in the Parkade in the background goes underground. The Cybertruck is often shown on Mars, in fact I have an amazing CGI video clip of it that I posted once. So this little kid compacts into a cyber truck and then vanishes out of sight...

Cybertruck... and the Parkade goes down into the basement… Think about Cyberpunk77 and how it's linked to Keanu Reeves who has played the character John in approximately 30 movies. Think of Christopher Reeves and Elon Reeve Musk...

Replenishing areas like Mars — and look at those bottles of water... do you know when they show those crazy videos on TickTock of the earth splitting into? They do it right where the land and water meets...

Ya... f'n funny alright... real funny. The real joke about two worlds and what Mars really is...

So why not scare the sh*t out of everyone and create a fallacy that the earth is going to break into 2. Surely people won't even wonder what 2 worlds means after that is accomplished. It's real. Beyond our 1st world problems.

The firmament is a dome. Also the "time capsule" and snow globe. The Underground Railroad to save children has a chain for a logo like blockchain. CovFeFe is the "Y" and it's quantum. Our earth is also a battery... the seam we see in the circle... or on SpaceX Mission Patches.

These panda eyes now have hearts and happy kiddos. Thankyou to all those that are part of these missions. And thank-you @elonmusk ■■

MARSH-MELLOWS = MARS
Johnny Cash wrote “Ring of Fire”
(Well it was June... Johnny sang it)
Came of of the fire in ‘63 just like a burning Phoenix Falcon...
Thanks for the help with cleaning up the sky and the dummy’s. Peace on Earth, and Mars.

Funny how “warped” our perception is when we read coms wrong. Sometimes there is a direct route and you don’t have to hyper loop around to get there...

The ring of fire... BURN BURN BURN... that ring of fire... stock up up popcorn and Mars-mellows.

The ring of fire... burn burn burn. Thanks @elonmusk
