■Analysis Thread■

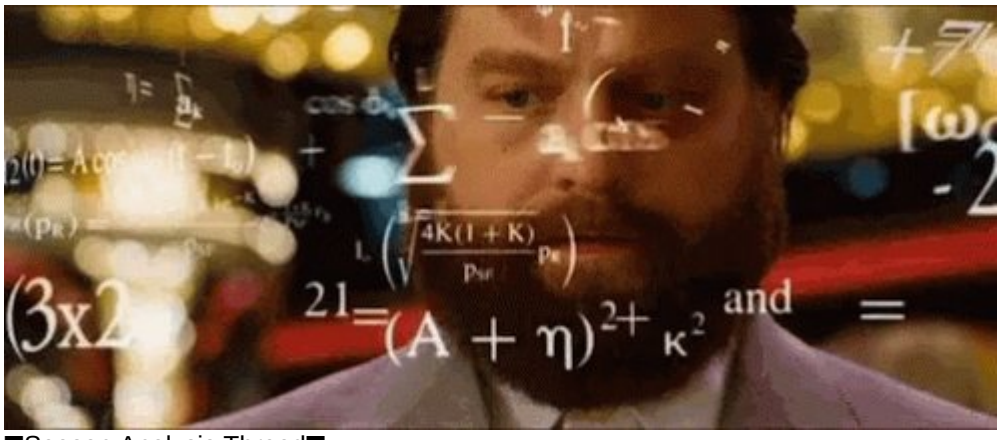

As we've reached the half way point of the season, inspired by old posts on @FFScout & @KaramTayser I've done a half season analysis■

This analysis will look at two things:

❤■Consistency v Explosiveness■
■Reliability v Risk■

1/20

■Season Analysis Thread■

To do this, I've split it into 4 categories:

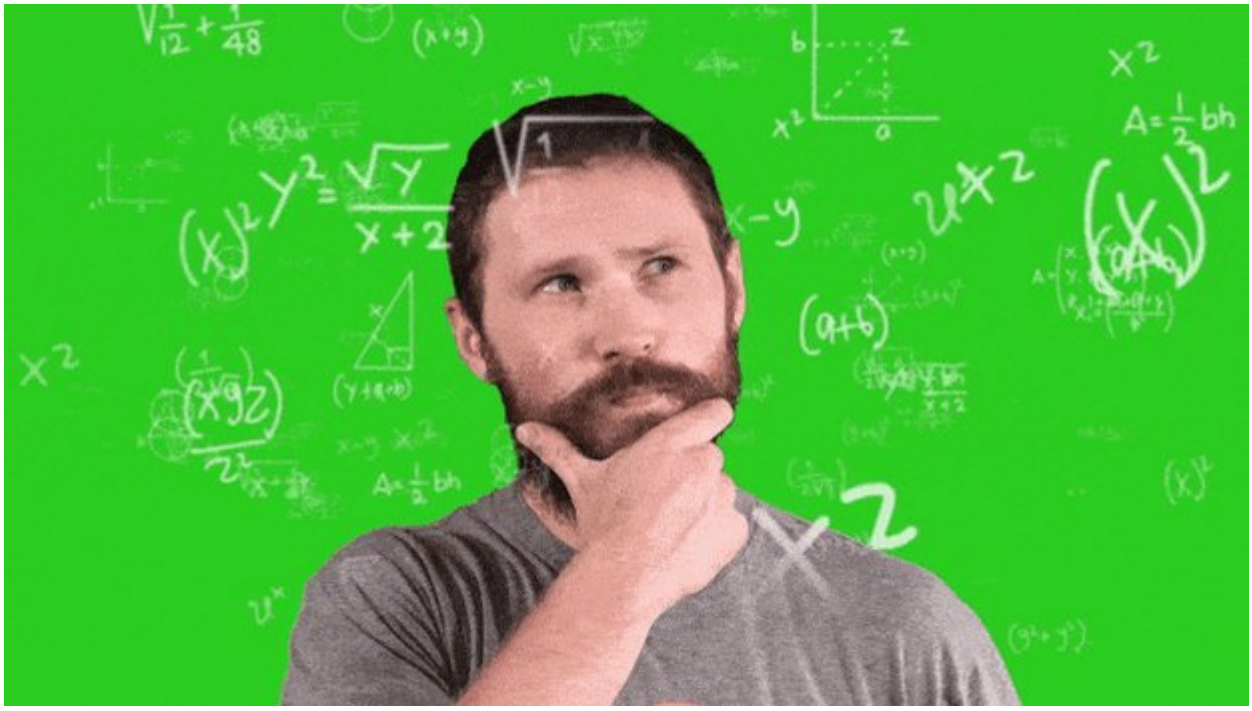

■Premium (MID & FWD above £9.5m)
■Non-Premium (MID & FWD £9.4m - £6.2m)
■Budget (MID & FWD below £6.2m)

■■Defenders

I've used the 10 highest scoring from each category■

■Premium CvE■

First is Premium assets, looking at Consistency v Explosiveness for top 10 highest scorers. Games showing 1 & 2+ return & points.

Criteria to meet:

■ Explosive: ≥ 25% 2+ returns
❤■Consistent: ≥ 40% 1+ returns
■Risky: ≥ 50% Blanks

■Analysis■

A lot consistency & reliability cross over, but isn't necessarily the exact same. Overall the thread/charts convey decent info, but I will be looking to build upon this in an article in the coming days to flesh it out more.
