Weird, right?

Jean-Louis Warnholz is Founding Principal and Managing Director of the BlackIvy Group. He worked in senior advisory positions for governments (UK, US), multilateral institutions (World Bank, UN) and private entities (Soros Economic Development Fund, S&P).

SOROS backed Clinton Staffer/Employee, Cheryl Mills and the Clintons recommended SMARTMATIC back in 2010 bc they held a "successful" election in the Philippines which was later discovered to be wrought with fraud and illegalities.

Five days before the elections, petitions were made to postpone the elections due to technical malfunctions with the electronic voting machines. The corrupt Supreme Court overrode these concerns.

A report by GFN 2010 Election Observers Team released on May 27 titled "Foreign Observers Challenge Election Legitimacy", presented arguments questioning the May 10, 2010 elections.

1. The Automated Election System (AES) was implemented without the appropriate field testing, and law-specified testing in actual elections.

2. The source code review was not completed and initial findings were not addressed.

3. No audit was done on the AES prior to the elections. There was only a mandated random manual audit which was not yet done at the time the report was written on May 27, 2010.

4. Several voter and security features were disabled prior to elections.

What we've just witnessed in the U.S. is straight out if a playbook, well designed and practiced. None of this happened by chance. They view you as property. They own you.
